The Politics of Education in Developing Countries Sam Hickey, Naomi Hossain, 2019-02-21 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio economic and other factors The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries Bangladesh Cambodia Ghana Rwanda South Africa and Uganda The problem of education quality is serious across the Global South The Politics of Education in Developing Countries From Schooling to Learning deploys a new conceptual framework the domains of power approach to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries

College Disrupted Ryan Craig, 2025-09-23 For nearly two decades pundits have been predicting the demise of higher education in the United States Our colleges and universities will soon find themselves competing for students with universities from around the world With the advent of massive open online courses MOOCs over the past two years predictions that higher education will be the next industry to

undergo disruption have become more frequent and fervent. Currently a university's reputation relies heavily on the four Rs in which the most elite schools thrive: rankings, research, real estate, and rah i e sports. But for the majority of students who are not attending these elite institutions, the four Rs offer poor value for the expense of a college education. Craig sees the future of higher education in online degrees that unbundle course offerings to offer a true bottom line return for the majority of students in terms of graduation, employment, and wages. *College Disrupted* details the changes that American higher education will undergo, including the transformation from packaged courses and degrees to truly unbundled course offerings along with those that it will not. Written by a professional at the only investment firm focused on the higher education market, *College Disrupted* takes a creative view of the forces roiling higher education and the likely outcome, including light-hearted real-life anecdotes that illustrate the author's points.
