Levels of Explanation Katie Robertson, Alastair Wilson, 2024-12-09 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. The different sciences furnish us with a wide variety of explanations: some work at macroscopic scales, some work at microscopic scales, and some operate across different levels. How do these different explanatory levels relate to one another and what is an explanatory level in the first place? Over the last 50 years, more and more philosophers, both reductionists and anti-reductionists, no longer subscribe to the idea that the best explanation resides at the fundamental physical level. New challenges arise from the success of scientific explanations employing multi-level models which mix levels of explanation from distinctive differences between levels, structures in biology, cognitive science, and social science from the apparently radical reimagining of the explanatory role of spacetime in our current best theories of fundamental physics, and from the enduring mystery of how higher level explanations are possible in the first place. These questions naturally connect to classic philosophical ways of thinking about the relationships between levels, reduction, emergence, and fundamentality. This volume presents a snapshot of cutting edge research on explanatory levels from their conceptual foundations to the details of how they are used in scientific practice. MACROECONOMICS CHAUHAN, S. P. S., 2025-09-15 The book intends to lay bare the intricacies of the discipline in a simple and systematic manner for readers pursuing undergraduate and postgraduate courses of various universities and also those pursuing professional programs in management institutions. The objective is to develop masters of the discipline who understand the subject deeply. Even those who hail from streams different from economics would feel at home with the discipline without any external help. All concepts are demonstrated with real world examples to make the readers feel at ease with them. Unlike many foreign authors who weave the discipline unsystematically with jargon of vocabulary, the book is systematic and terms in use are explained with illustrative examples. Also, unlike some other authors who believe in exploring the depths of the discipline to expose all the versions of a concept but leave the conclusions to the readers to draw, this book too does the exploring but ensures to conclude the true nature of the concept, leaving no room for confusion. Pedagogical features such as illustrative explanations and testing exercises that make a reader master of the discipline give strength to the book. The scientific formulation of the discipline from the ground level to its heights of contemporary applications makes the book valuable to the readers. **KEY FEATURES** Over 25 Illustrative Tables Over 30 Solved Examples Over 100 Explanatory Figures Over 400 Exercises with Hints and Solutions Real world Connection of Concepts **TARGET AUDIENCE** B Com M Com BBA MBA

Fiscal Policy within the IS-LM Framework Shahdad Naghshpour, 2014-01-17 Undoubtedly what happens to the economy affects the lives of the citizens of a country and often the lives of people in other countries around the globe In addition to natural disasters two things affect the economy more than anything else monetary and fiscal policies Fiscal policy and monetary policy represent forms of government intervention to influence market performance Fiscal policy relates to government spending and revenue collection monetary policy relates to the supply of money which is controlled by factors such as reserve requirements and interest rates If there were a universally accepted set of rules that prescribe appropriate actions to bring and sustain prosperity to the economy the study of economics would have been a positive science as opposed to a collection of normative beliefs The study of these policies is normative in nature because fiscal and monetary policies do not necessarily impact everyone equally or in the same way In other words not everybody loses or gains equally as the result of fiscal and monetary policies Nevertheless there are non normative economic theories that explain the expected outcome of specific fiscal or monetary policies The economists that advocate for fiscal or monetary policies generally agree on the economic consequences produced by each policy when implemented What differentiates the economists is the degree to which they believe in the effectiveness of the policy their ability to know the extent of the need that it is intended to address the proper amount of intervention required in order to effect the desired correction and the length of the time it would take to see the consequence of the policy This book covers fiscal policy It is part of a projected two volume set covering fiscal and monetary

policies The two volumes will be written to be complimentary to but independent of each other *Islamic Capital Markets*
