Uncertainty and Environmental Decision Making Jerzy A. Filar, Alain Haurie, 2010-05-03 The 21st century promises to be an era dominated by international response to certain global environmental challenges such as climate change depleting biodiversity and biocapacity as well as general atmospheric water and soil pollution problems Consequently Environmental decision making EDM is a socially important field of development for Operations Research and Management Science OR MS certainty is an important feature of these decision problems and it intervenes at very different time and space scales The Handbook on Uncertainty and Environmental Decision Making provides a guided tour of selected methods and tools that OR MS offer to deal with these issues Below we briefly introduce peer reviewed chapters of this handbook and the topics that are treated by the invited authors The first chapter is a general introduction to the challenges of environmental decision making the use of OR MS techniques and a range of tools that are used to deal with uncertainty in this domain *Wellness* David J. Ansbaugh, Michael H. Hamrick, Frank D. plates Many of these pesticides are the modern day equivalent of DDT However scant research exists on the chemical soup of poisons that our children consume on a daily basis As our food supply environment reels under the pressures of industrialization via agrochemicals our kids have become the walking evidence of this failed experiment What s Making Our Children Sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply Perro and Adams book is an alarming eye opening read that documents more clearly than ever the devastating consequences that pervasive pesticide use in food production is having on our health and the urgent need to protect our children from a system that prefers we treat illness and disease with pills rather than prevention Carey Gillam journalist author of Whitewash
