### Appendix E11: Emergency Closure Gate and Valve Condition Assessment

#### **E11.1 GENERAL**

Emergency closure gates and valves are key safety components in the power train at hydroelectric powerplants. Unexpected failure can have a significant economic impact due to the high cost of emergency repairs and lost revenues during an extended forced outage. Failure of emergency closure equipment can also affect life safety.

Determining the present condition of an emergency closure gate and valve is an essential step in analyzing the risk of failure. This appendix provides a process for arriving at an Emergency Closure Gate and Valve Condition Index which may be used to develop a business case addressing risk of failure, economic consequences, and other factors.

#### **E11.2 SCOPE / APPLICATION**

The condition assessment methodology outlined in this appendix applies to hydroelectric powerhouse emergency closure equipment. The condition assessment primarily focuses on the gates, valves, and associated operators (i.e., hoists, hydraulic cylinders, and valve operators). The appendix does not apply to closure systems that are not used for emergency purposes.

In recognition that many organizations have facility safety review programs, it is intended that the assessments described herein fully utilize information provided by such reviews to avoid duplication of work and to minimize outage time. This information may be available in the form of comprehensive facility reviews, special examinations, maintenance databases, and operational reports. If the assessment requires an additional physical inspection, then it should be coordinated with the organization's existing review program.

This appendix is not intended to define maintenance practices or describe in detail inspections, tests, or measurements. Utility-specific maintenance policies, procedures, and guidelines must be consulted for such information.

#### **E11.3 CONDITION AND DATA QUALITY INDICATORS AND EMERGENCY CLOSURE SYSTEM CONDITION INDEX**

This appendix describes the condition indicators generally regarded by hydro plant engineers as providing the initial basis for assessing the condition of the emergency closure system. The

*Design of Hydrodynamic Machines* Getu Hailu, Michal Varchola, Peter Hlbocan, 2022-05-24 *Design of Hydrodynamic Machines* provides a broad yet concise theoretical background on the relationship between fluid dynamics and geometry. It covers the most important types of turbomachinery used in power generation, industrial processes, utilities, and the oil and gas industry. Offering guidance on the hydraulic design aspect of different parts of turbomachinery such as impellers, diffusers, volute casing, inlet and outlets, the book discusses how to conduct performance characteristics testing and evaluate performance parameters of the designed parts. It also covers aspects of CFD of turbomachinery. Readers will be able to perform hydraulic design of important turbomachinery parts using commercially available software. Intended for final year undergraduates and postgraduates in mechanical, civil, and aeronautical engineering, the book will also be useful for those involved in the hydraulic design, analysis, and testing of turbomachinery.

*Rock Engineering Risk* John A. Hudson, Xia-Ting Feng, 2015-05-05 This book provides a new, necessary, and valuable approach to the consideration of risk in underground engineering projects constructed within rock masses. There are chapters on uncertainty and risk, rock engineering systems, rock fractures, and rock stress. The design of a repository for radioactive waste, plus two major case examples relating to the

*Assessment of Energy Sources Using GIS* Lubos Matejicek, 2017-03-20 This volume is a comprehensive guide to the use of geographic information systems (GIS) for the spatial analysis of supply and demand for energy in the global and local scale. It gathers the latest research and techniques in GIS for spatial and temporal analysis of energy systems, mapping of energy from fossil fuels, optimization of renewable energy sources, optimized deployment of existing power sources, and assessment of environmental impact of all of the above. Author Lubos Matejicek covers GIS for assessment of a wide variety of energy sources including fossil fuels, hydropower, wind power, solar energy, biomass energy, and nuclear power, as well as the use of batteries and accumulators. The author also utilizes case studies to illustrate advanced techniques such as multicriteria analysis, environmental modeling for prediction of energy consumption, and the use of mobile computing and multimedia tools.

2023 International Conference on Energy Engineering Zhe Chen, Wenming Yang, Hao Chen, 2024-08-31 This book contains the selected proceedings of the 2023 International Conference on Energy Engineering held in Xi'an, China, December 15-17, 2023. The conference explores advances and practical applications in energy research and engineering and delves into innovative approaches in four specialized tracks: New Transportation Energy, Power and Energy Applied, Thermal Energy, and Oil and Natural Gas Engineering. It explores strategies for accelerating the transition to renewable energy, optimizing power systems, harnessing thermal energy, and advancing oil and gas engineering practices. It benefits from a wealth of knowledge shared by academics and practitioners, fostering cross-disciplinary collaboration. The latest findings in electric vehicles, smart grids, thermal systems, and reservoir engineering will be explored to find solutions that promote sustainability, efficiency, and

environmental stewardship      River and Coastal Engineering Ramakar Jha,Vijay P. Singh,Vivekanand Singh,L.B. Roy,Roshni Thendiyath,2022-08-03 This book deals with important topics of current interest such as climate change floods drought and hydrological extremes The impact of climate change on water resources is drawing worldwide attention in these days water resources in many countries are already stressed and climate change along with burgeoning population rising standard of living and increasing demand are adding to the stress Further river basins are becoming less resilient to climatic vagaries Fundamental to addressing these issues is hydrological modelling which is covered in these books Further integrated water resources management is vital to ensure water and food security Integral to the management is groundwater and solute transport The books encompass tools that will be useful to mitigate the adverse consequences of natural disasters This book is useful for those working in river and coastal engineering River Engineering is important for fluvial hydraulics sediment transport morphometry desilting trap efficiency silting and desilting process Coastal engineering includes storm surge forecast optimization of harbour wave modelling and shoreline changes      **Guide to Vulnerability Analysis for Computer Networks and Systems** Simon Parkinson,Andrew Crampton,Richard Hill,2018-09-04 This professional guide and reference examines the challenges of assessing security vulnerabilities in computing infrastructure Various aspects of vulnerability assessment are covered in detail including recent advancements in reducing the requirement for expert knowledge through novel applications of artificial intelligence The work also offers a series of case studies on how to develop and perform vulnerability assessment techniques using state of the art intelligent mechanisms Topics and features provides tutorial activities and thought provoking questions in each chapter together with numerous case studies introduces the fundamentals of vulnerability assessment and reviews the state of the art of research in this area discusses vulnerability assessment frameworks including frameworks for industrial control and cloud systems examines a range of applications that make use of artificial intelligence to enhance the vulnerability assessment processes presents visualisation techniques that can be used to assist the vulnerability assessment process In addition to serving the needs of security practitioners and researchers this accessible volume is also ideal for students and instructors seeking a primer on artificial intelligence for vulnerability assessment or a supplementary text for courses on computer security networking and artificial intelligence      **Hydro Review** ,1994-02      **Sustainable Energy Development and Innovation** Ali Sayigh,2022-02-24 This book contains selected papers presented during the World Renewable Energy Congress WREC 2020 at the Instituto Superior Tecnico in Lisbon The WREC is dedicated to promoting renewable energy global development and features top international experts policy makers scientists engineers technology developers and business practitioners addressing the most current research and technological breakthroughs in sustainable energy development and innovation The contributions address policy and renewable energy technologies and applications in all sectors for heating and cooling agricultural applications water desalination industrial applications and for the transport sectors Presents cutting edge research in green building and

Maxwell Ph.D.,2016-09-26 Discover the leadership strengths of world class mountain guides and see how developing and applying these principles can help you reach for the highest summits in work and in life This intriguing approach to business and personal success introduces six leadership strengths of world class mountain guides demonstrating social intelligence adopting a flexible leadership style empowering others facilitating the development of trust managing risk in an environment of uncertainty and seeing the big picture The premise is that these same strengths provide a valuable model in the workplace and other networks whether one is already in a leadership position or aspiring to get there The result of more than a decade of research combined with the author s personal experience the book explains how mountain guides coach people to reach for their highest goals in the most challenging environments often enabling them to far exceed what they imagined possible The same principles can be applied in business and elsewhere To set readers on the right path the author explains six strengths of guides incorporating interviews and quotes from guides and expedition participants to illustrate leadership lessons and show how they can be successfully used off the slopes The book also provides a checklist of action steps readers can follow to foster skill development **Handbook of Generation IV Nuclear Reactors** Igor Piro,2022-12-07 Handbook of Generation IV Nuclear Reactors Second Edition is a fully revised and updated comprehensive resource on the latest research and advances in generation IV nuclear reactor concepts Editor Igor Piro and his team of expert contributors have updated every chapter to reflect advances in the field since the first edition published in 2016 The book teaches the reader about available technologies future prospects and the feasibility of each concept presented equipping them users with a strong skillset which they can apply to their own work and research Provides a fully updated revised and comprehensive handbook dedicated entirely to generation IV nuclear reactors Includes new trends and developments since the first publication as well as brand new case studies and appendices Covers the latest research developments and design information surrounding generation IV nuclear reactors **FASTCHEM [superscript TM] Package: User's guide to the EICM coupled geohydrochemical transport code** ,1988 ICEMBDA 2023 Jianguo Liu,Haifeng Li,Sikandar Ali Qalati,2024-01-19 The 4th International Conference on Economic Management and Big Data Applications was successfully held in Tianjin China from October 27th to 29th 2023 This conference served as a platform for researchers scholars and industry professionals to exchange knowledge and insights in the field of economic management and the application of big data The conference held great significance in advancing the understanding and application of economic management and

big data By bringing together experts from around the globe the conference facilitated the exchange of innovative ideas and research findings contributing to the development of these fields The topics covered during the conference showcased the latest advancements and trends in enterprise economic statistics information evaluation blockchain technology industrial structure optimization information retrieval data regression analysis intelligent Internet of Things platforms and data encryption The discussions and presentations during the conference allowed participants to explore new methodologies strategies and technologies that can enhance economic management practices and leverage the potential of big data The conference provided a platform for scholars and practitioners to share their experiences insights and best practices fostering collaboration and networking opportunities Furthermore the proceedings were published ensuring the dissemination of valuable research findings to a wider audience The collective knowledge and research presented at the conference will contribute to the academic community industry professionals and policymakers enabling them to make informed decisions and develop effective strategies in the fields of economic management and big data applications Overall the 4th International Conference on Economic Management and Big Data Applications played a pivotal role in promoting knowledge exchange fostering innovation and shaping the future of economic management by harnessing the power of big data

*Fish passage technologies : protection at hydropower facilities.* ,1995 The focus of this report is technologies for fish passage around hydropower generation facilities and protection against entrainment and turbine mortality Emphasis is given to Federal Energy Regulatory Commission FERC licensed hydropower projects where fish protection is a subject of controversy and congressional interest due to the Federal Power Act FPA and the Electric Consumers Protection Act ECPA Thus institutional issues related to FERC relicensing are also discussed Major points of controversy are high lighted in box 1 1

*Lees' Loss Prevention in the Process Industries* Frank Lees,2005-01-25 Over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard reference work for chemical and process engineering safety professionals For years it has been the most complete collection of information on the theory practice design elements equipment regulations and laws covering the field of process safety An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals

engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world s chief experts in this field Sam Mannan is professor of chemical engineering at Texas A principles practice codes standards data and references needed by those practicing in the field     **A Guide to Designing Legal and Institutional Frameworks on Alien Invasive Species** Clare Shine,Nattley Williams,Lothar Gündling,2000
