Loma Acs 10study Guide:

Performance of Structures During the Loma Prieta Earthquake of October 17, 1989, 1990 Immediately following the magnitude 7.1 Loma Prieta earthquake of October 17, 1989, a team representing the Interagency Committee on Seismic Safety in Construction surveyed the damage to buildings, utilities, and transportation structures. This report is based primarily on the data gathered during the site survey and the results of preliminary analyses of structural failures. Most structures designed in accordance with modern codes and standards performed well without serious structural damage. However, there were many concrete and masonry buildings and highway structures in the San Francisco Bay area which were not designed according to modern seismic design codes and which did not perform well. The majority of damaged structures had not been strengthened to increase earthquake resistance. Except for two deaths from landslides and one from fire, the remainder of the 62 deaths from the earthquake was due to partial or total collapse of older structures. This investigation provided the basis for recommendations to improve design and construction practices for buildings and lifeline structures and to mitigate damage to existing structures in future earthquakes.

Loarne-Lemaire, Adnane Maalaoui, 2020-06-09 This book provides new insights into how the concept of bricolage is used to foster research on social entrepreneurship. The contributors assess the relevance of the concept from a theoretical point of view, questioning the concept and its relationships with similar concepts or theories like those of effectuation and improvisation. They use the concept of bricolage to study processes by which social entrepreneurs make their business grow and investigate the diversity of social entrepreneurial situations and, as a consequence, the variety of forms and effects of bricolage practices. The primary objective of this book is thus to shed light on bricolage in social entrepreneurship, especially at the intersection of different levels of analysis and in different contexts. It takes stock of existing research at the intersection of both concepts and looks at future research avenues. This book was originally published as a special issue of *Entrepreneurship and Regional Development*.
