Driemel,2023 This book provides a detailed cross linguistic study of pseudo noun incorporation a phenomenon whereby an
argument forms a closer than usual relation with the verb Imke Driemel explores eleven noun types across five different
languages to arrive at a unifying theory that accounts for all properties of pseudo noun incorporation California. Court of
Appeal (2nd Appellate District). Records and Briefs California (State)., Phrase Structure and Argument Structure Terje
Lohndal,2014-06-26 This book focuses on the relationship between syntax and meaning Terje Lohndal s core claim is that it is
possible to create a transparent mapping from syntax to logical form such that each syntactic Spell Out domain directly
corresponds to a conjunct at logical form The argument focuses on two domains of grammar phrase structure and argument
structure and brings together two independently established but seemingly unconnected hypotheses that verbs do not
require arguments and that specifiers are not required by the grammar Following the introduction the second chapter looks
in detail at the separation of the verb from its thematic arguments and presents data from argument structure reciprocals
and adjectival passives while the third examines the claim that specifiers do not play a role as the target of various
grammatical operations Chapter 4 then brings these arguments together and proposes a syntax that maps transparently onto
logical forms where all thematic arguments are severed from the verb Moreover the broader consequences of this approach
are outlined in terms of Spell Out movement linearization thematic uniqueness and agreement The book closes with an
examination of the relationship between grammatical and conceptual meaning and a detailed discussion of the nature of
compositionality Proceedings of the West Coast Conference on Formal Linguistics Megan Crowhurst,1987 **Popular**
