modeling and GIS T **Geopolitics and Development** Marcus Power, 2019-01-25 *Geopolitics and Development* examines the historical emergence of development as a form of governmentality from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus, and an aspiration have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood, and sovereignty to the pursuit of development along with its enrolment in various ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between development and counterinsurgency, the role of the state and social movements in reimagining development, the rise of re-emerging donors like China, India, and Brazil, and the growing significance of South-South flows of investment, trade, and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author's own original empirical research, this is an essential critical and interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and postgraduate students in development studies, human geography, African studies, and international relations, this book provides an engaging, invaluable, and up-to-date resource for making sense of the complex entanglement between geopolitics and development past and present. **Islamic Development in Palestine** Stephen Royle, 2016-10-04 This book assesses the capabilities of an Islamic approach in aiding self-organisation by examining the case of the occupied Palestinian territories in conjunction with a comparative analysis of four other nations. Three main mechanisms of Islamic development are explored: finance, microfinance, and charity. Identifying the need to recognise the non-linear nature of societal interaction at the individual, community, and state levels, the book uses complexity theory to better understand development. It assesses the role of Islamic development at macro and micro levels and identifies issues with rigid and hierarchical policy making. *Survival October-November 2020: Pandemics and politics* The International Institute for Strategic Studies (IISS), 2023-04-21 *Survival*, the IISS's bimonthly journal, challenges conventional wisdom and brings fresh, often controversial perspectives on strategic issues of the moment. In this issue, Adam Roberts explores pandemics and politics through the ages, arguing that trust in leadership is essential in the struggle against infectious diseases. Rebecca Barber and Sarah Teitt contend that ASEAN should take a more activist approach to the Rohingya crisis to salvage its credibility. Greg Austin assesses the strategic implications of China's weak cyber defences. Tunsj casts doubt on the prospect of the Arctic becoming a theatre of great power conflict. And eight more thought-provoking pieces, as well as our regular book reviews and Noteworthy column. *Fluid Modernity* Gilberto Conde, 2022-10-31 *Fluid Modernity* offers an innovative, encompassing historical grasp of the politics of water in the Middle East in the context of modern capitalism and world politics. **Visual Politics and North Korea** David Shim, 2013-10-15 In the realm of international relations there are seemingly few states like North Korea Whether it is the country's human rights situation its precarious everyday life or its so called foreign policy of coercion and nuclear brinkmanship no matter what this pariah nation says and does it affects the state and stability of regional and global politics But what do we know about North Korea and how do we come to know it This book argues that visual imagery plays a decisive role in this operation By discussing two exemplary areas everyday photography and satellite imagery the book takes into account the role of images in the way that particular issues related to North Korea are understood in contemporary geopolitics Images work They do something by evoking a particular perspective of what is shown in them allowing only specific ways of seeing and knowing In this sense images are deeply political Individual methodological usages in the book can provide a procedural basis from which to start or rethink further studies on visuality both in IR and beyond It also opens an innovative path for future studies on East Asia making the book attractive to a range of specialists and thus holding an appeal beyond the boundaries of a single discipline
