

BASIC SET-UP: Set the controls as per this diagram. Then run through the 3 sounds by using the Channel Select footswitch and the Alternate Channel push key located between the Middle and Treble controls.

OUTPUTS:

TO GUITAR AMP: This jack is provided to allow interfacing with existing amplifiers, giving the user an additional three sounds (two are footswitchable) and thus expanding the potential of virtually any amp. You will find the inherent quality of V-TWIN'S voices to be a nice addition to even the coolest circuits. When using this jack the V-TWIN can be set up two different ways: **1 Normal** = Footswitchable from Clean to Solo, or **2 Alternate** = Footswitchable from Blues to Solo. In most situations using an existing amplifier that has a clean channel - one would choose the Alternate configuration.

In this set-up you would use the host amplifier's clean sound having V-TWIN in Bypass (LED on) and activate V-TWIN for two different soloing sounds...Blues or Solo. See illustration below.

However, the Normal configuration works great if you need an alternate clean sound of a different level and tone. The Normal position can also work great for driving an amplifier's front end stage into clip by using the Clean mode and setting V-TWIN'S Gain control high and switching it in for the *pushed* rhythm sound or a lower gain Solo sound.
