Mababaya,2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom s socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general Saturday Review ,1866

ended in catastrophe His inability to manage the social and political conflicts that were now emerging among various factions within the community led to his death at the hands of Muslim rebels The consequences of this tragic event were bitter not only a century of civil war but also political and religious schisms of such depth that they have not been entirely healed even now Most medieval Muslim historians told this story in an overtly partisan manner but al abar demands more of his readers First of all they must decide for themselves on the basis of highly ambiguous evidence whether Uthm n s death was tyrannicide or murder But more than that they must ask how such a thing could have happened at all what had the Muslims done to bring about the near destruction of their community Al abar presents this challenge within a broad framework For even while the internal crisis that issued in Uthm n s death was coming to a head the wars against Byzantium and Persia continued The first expeditions into North Africa the conquest of Cyprus the momentary destruction of the Byzantine fleet at the Battle of the Masts the bloody campaigns in Armenia the Caucasus and Khurasan are all here in narratives that shift constantly between hard reporting and pious legend Muslim forces retain the offensive but there are no more easy victories henceforth suffering and endurance will be the hallmarks of the hero Most evocative in the light of Uthm n s fate is the moving account of the murder of the last S s nian king Yazdagird III a man betrayed by his nobles and subjects but most of all by his own character
