### **How to use it:**

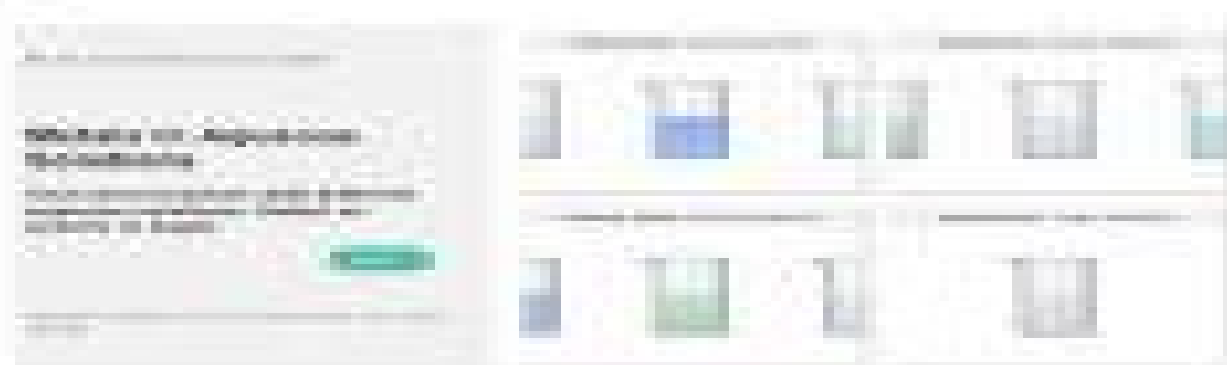

Some elements are more reactive than others, meaning that they can more easily be broken apart into their ions than others. These are listed in their place respectively in "less" reactive. Other elements are less reactive and more likely to be broken apart into ions. This simulation will allow you to test various combinations of elements and compounds, as well as reactions of elements, to see how they react. It also includes a list of all the elements and their reactivity. Some elements are more reactive than others, meaning that they can more easily be broken apart into their ions than others.
