It might be argued that the report's findings are biased because the study's participants were not randomly selected. The study did not include a control group who were not exposed to the media coverage, and the results are likely to be affected by the study's design.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

These findings suggest that there are important differences between the two studies.
