*How can sustainability be increased at our school?*

Sustainability is based on a simple principle: Everything that we need for our survival and well-being depends, either directly or indirectly, on our natural environment. Sustainability creates and maintains the conditions under which humans and nature can exist in productive harmony, that permit fulfilling the social, economic and other requirements of present and future generations.

Basic Fundamentals Of Research Methodology Nitin G. Shinde, 2024-01-13. Numerous academic disciplines including health, education, psychology, social work, nursing, public health, library studies, marketing, research, and pharmaceutical sciences incorporate research methodology into their curricula in various ways. The fundamental philosophical underpinning of this book is my conviction that despite the fact that the subject matter of these disciplines differs, their overall approach to conducting research is comparable. As the years have passed, considerable debate has surrounded the definition of research, the optimal methods for conducting it, and the comparative merits of various approaches. With this in consideration, the current book was authored with two distinct aims: i) to provide guidance to researchers of all disciplines in selecting the most suitable methodology for their research endeavors, and ii) to acquaint readers with the intricacies of employing various research methods and techniques. With any luck, the modest endeavor manifested in this book may contribute to the successful completion of both exploratory and outcome-driven research endeavors.
