Speed Control
DC motor

MATLAB Simulink

The image displays a MATLAB Simulink model for a speed control system. The model is shown in two stacked views, both enclosed in an orange border. The top view shows a control loop where a reference input (a step function) is fed into a controller block, which then drives a DC motor block. The bottom view shows the same system with a feedback loop, where the motor's output is measured and fed back to the controller. The DC motor block is represented by a standard Simulink motor model, and the feedback loop includes a gain block and a summing junction. The text 'Speed Control' and 'DC motor' is overlaid on the right side of the image, with arrows pointing to the respective components in the diagram. Below the diagram, the text 'MATLAB Simulink' is displayed.
