Higher Education Leadership and Governance in the Development of the Creative and Cultural Industries in Kenya Akuno, Emily, Ondieki, Donald Otoy, 2017-05-05 The role of higher education in

establishing structures and procedures in society and industry is clearly articulated in scholarly discussions. The narrative has recently taken a new momentum in Kenya with acknowledgement of the creative industry involves many youth as an area that impacts on the economy. In unravelling the link between higher education and industry, the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry. Through analysis of cases, the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects, noting how these affect the creative industry in Kenya. This book approaches the creative disciplines from the perspectives of the students, lecturers, and university administrators. The three voices provide a balanced view of what higher creative arts education in Kenya is. The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education and their growth in industry. The key concepts here are the development of the creative industry and how higher education should contribute to the same. **Thus Until** Emilia Ilieva, Reuben

Matheka, 2025-08-04. **Thus Until** A History of Egerton University is a thorough historical, chronological, and well-researched account of Egerton University from a whites-only college when it started in 1939 through to the expansion it has experienced over the years, culminating in being a full university. More than any other university in Kenya, Egerton has a long and colourful history, but like all the other universities, it has suffered from the political, economic, and financial challenges of the time, especially since the double intake of the 1990s. Chapter One provides the required background to the study, highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period. The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived. The chapter dispels some of the popularly held myths about him. Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all-white establishment. The chapter ends with Africans beginning to agitate for change. With great attention to detail, the later chapters put the university in a broader local and international context, thereby increasing its relevance to society. A History of Egerton University, though heavily footnoted and with a detailed bibliography, is written in a simple, easy-flowing and accessible style. *Science, Religion and Society* Arri Eisen, Gary
