Gender Roles in the Future? Theoretical Foundations and Future Research Directions Alice H. Eagly, Sabine Sczesny, 2019-11-01 The study of gender is deservedly a major focus of research in the discipline of psychology in general and social psychology in particular Interest in the topic increased sharply in the 1970s with the flowering of the feminist movement and research has continued to advance since that time In 1987 Alice Eagly formulated Social Role Theory to explain the behavior of women and men as well as the stereotypes attitudes and ideologies that are relevant to sex and gender Enhanced by several extensions over the intervening years this theory became one of the pre eminent if not the central theory of gender in social psychology Also over the last decades social psychologists have developed a variety of related approaches to understanding gender including for instance theories devoted to stereotyping leadership status backlash lack of fit to occupational roles social identity and categorization Reflecting these elements this e Book includes articles that encompasses a wide range of themes pertaining to sex and gender In these papers the concept of social roles appears often as central integrative concept that links individuals with their social environment These articles thereby complement social role theory as the authors reach out to build an extended theoretical foundation for gender research of the future

Article 8 ECHR, Family Reunification and the UK's Supreme Court Helena Wray, 2023-02-09 How do courts reconcile protecting family life with immigration control in human rights cases This book addresses that question through an analysis of 11 UK Supreme Court decisions on immigration and family life mostly focusing on Article 8 ECHR the right to respect for family life and starting with *Huang v SSHD* in 2007 The analysis is set against a national context that includes the Human Rights Act 1998 and regular controversies over immigration The book explains how the European Court of Human Rights jurisprudence has developed in recent years but particularly in the absence of children it often still awards little weight to claims by citizens and residents to be joined by family when immigration status is an issue This reflects governments resistance to encroachment on their control over borders The Supreme Court decisions show that despite powers conferred by the Human Rights Act a more nuanced position in domestic law was difficult to articulate and sustain The book explores the way in which these problems were reflected in the changing language argumentation and structure of

judgments These problems revealed judges to be strategic actors drawing on personal and institutional values and responding to the shifting political context A more generous reading of Article 8 would be legally coherent but needs wider societal support to be realisable The book ends with a discussion of how if such support were present the jurisprudence could give more weight to the needs of families It is vital reading for anyone interested in families and immigration and in the problems and potential of human rights adjudication

Higher Education, Meritocracy and Inequality in China Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for

social mobility Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it offers a valuable resource for researchers and non specialist readers alike
