

ENOVIA Engineering Configuration Central

ENOVIA® Engineering Configuration Central™ is used by manufacturers of low volume and highly complex products to define and manage the engineering bill-of-material (EBOM). It provides advanced product unit effectivity configuration management functionality to define the “engineering view” of specific product units.

Key Benefits

- Consolidate part design content from multiple Engineering systems and tools by providing a single definition of the EBOM
- Provide visibility to customer/unit specific EBOM configurations within a single, consolidated PLM solution
- Leverage the skills and knowledge of the enterprise and supply chain through the institutionalization of cross-functional product development and engineering change processes, which include the ability to manage complex product configuration changes using product unit effectivity
- Decrease product costs by enabling component engineers to qualify and manage purchased parts from multiple suppliers on a local or global basis
