Gaining Funding For Research Berry, Dianne,2010-07-01 Success at seeking and gaining funding is now a vital component of building of a successful research career The book sets out the case for why success at winning funding is so important from both an institutional and individual researcher perspective   *Pioneering Research* Donald W. Braben,2004-05-31 Ask questions not on the agenda Explore ideas wherever they lead Pursue goals because they re important Create options not yet perceived According to premier researcher Don Braben these are the vital intellectual processes that underlie all human achievement the kinds of risk taking activities that have made our civilization what it is today Yet warns Braben the same pioneer spirit that fueled our meteoric industrial and scientific growth is now being undermined by a growing climate of corporate caution and conformity In this groundbreaking manifesto on the importance of scientific freedom Braben asserts that the greatest long term risks facing humanity will not come from weapons of mass destruction prolonged global war devastating disease or famine or even from extinction by a huge wayward meteor Rather they will come from the debilitating attrition caused by the rising tides of bureaucracy and control that are steadily

strangling human ingenuity and undermining our future Addressing this serious and growing problem Pioneering Research A Risk Worth Taking explains the urgent need to maintain both the originality and freedom of expression that is so vital to our economic growth and scientific development Citing global trends and attitudes that currently threaten these conditions Braben details some bold new initiatives that may offer a possible solution A compelling read for today s scientists policy makers and concerned laypeople Braben s book will change our understanding of the politics of scientific achievement and expose the threat to our future from bureaucracy paper trails political correctness lowest common denominator solutions and accountability the invisible chains that bind the imagination and damage our society irreparably **The Guardian Postgraduate Guide** Alice Wignall,2012-07-31 Is postgraduate study right for me Will a second degree lead to more career opportunities Which subject should I choose How will I afford the fees and my rent Are there options for more flexible study if I want to stay in work If you re thinking of applying to do a second degree a PGCE a PhD or an MBA the chances are you ve already thought of at least some of these questions but where do you find the answers From the team behind the perennially popular not to mention indispensable Guardian University Guide comes The Guardian Postgraduate Guide packed full of useful information for everyone who s considering taking that next step on the education ladder From detailed profiles of more than 150 universities and higher education colleges and a comprehensive list of UK funding bodies to in depth articles on studying abroad The Guardian Postgraduate Guide has everything you need to decide on what s best for you It also includes a special section for overseas students covering visa applications the cost of living and academic differences Whether you want to apply for a course that will boost your career prospects or simply fancy doing some part time study to reawaken those brain cells The Guardian Postgraduate Guide will help you make the right decision **Official (ISC)2 Guide to the HCISPP CBK** Steven Hernandez,2018-11-14 HealthCare Information Security and Privacy Practitioners HCISPPSM are the frontline defense for protecting patient information These are the practitioners whose foundational knowledge and experience unite healthcare information security and privacy best practices and techniques under one credential to protect organizations and sensitive patient data against emerging threats and breaches The Official ISC 2 R Guide to the HCISPPSM CBK R is a comprehensive resource that provides an in depth look at the six domains of the HCISPP Common Body of Knowledge CBK This guide covers the diversity of the healthcare industry the types of technologies and information flows that require various levels of protection and the exchange of healthcare information within the industry including relevant regulatory compliance and legal requirements Numerous illustrated examples and tables are included that illustrate key concepts frameworks and real life scenarios Endorsed by the ISC 2 and compiled and reviewed by HCISPPs and ISC 2 members this book brings together a global and thorough perspective on healthcare information security and privacy Utilize this book as your fundamental study tool in preparation for the HCISPP certification exam **How to Manage International Multidisciplinary Research Projects** Hantrais, Linda,2022-08-05 This insightful How to guide is expertly crafted

to assist mid career academic and non academic researchers in preparing for new and innovative ways of working in international multidisciplinary environments   Managing Research Data Graham Pryor,2012-01-20 This title defines what is required to achieve a culture of effective data management offering advice on the skills required legal and contractual obligations strategies and management plans and the data management infrastructure of specialists and services Data management has become an essential requirement for information professionals over the last decade particularly for those supporting the higher education research community as more and more digital information is created and stored As budgets shrink and funders of research demand evidence of value for money and demonstrable benefits for society there is increasing pressure to provide plans for the sustainable management of data Ensuring that important data remains discoverable accessible and intelligible and is shared as part of a larger web of knowledge will mean that research has a life beyond its initial purpose and can offer real utility to the wider community This edited collection bringing together leading figures in the field from the UK and around the world provides an introduction to all the key data issues facing the HE and information management communities Each chapter covers a critical element of data management Why manage research data The lifecycle of data management Research data policies principles requirements and trends Sustainable research data Data management plans and planning Roles and responsibilities libraries librarians and data Research data management opportunities and challenges for HEIs The national data centres Contrasting national research data strategies Australia and the USA Emerging infrastructure and services for research data management and curation in the UK and Europe Readership This is essential reading for librarians and information professionals working in the higher education sector the research community policy makers and university managers It will also be a useful introduction for students taking courses in information management archivists and national library services   **Philanthropy and the Future of Science and Technology** Evan S. Michelson,2020-06-14 An increasingly important and often overlooked issue in science and technology policy is recognizing the role that philanthropies play in setting the direction of research In an era where public and private resources for science are strained the practices that foundations adopt to advance basic and applied research needs to be better understood This first of its kind study provides a detailed assessment of the current state of science philanthropy This examination is particularly timely given that science philanthropies will have an increasingly important and outsized role to play in advancing responsible innovation and in shaping how research is conducted Philanthropy and the Future of Science and Technology surveys the landscape of contemporary philanthropic involvement in science and technology by combining theoretical insights drawn from the responsible research and innovation RRI framework with empirical analysis investigating an array of detailed examples and case studies Insights from interviews conducted with foundation representatives scholars and practitioners from a variety of sectors add real world perspective A wide range of philanthropic interventions are explored focusing on support for individuals institutions and networks with attention paid to the role that science

philanthropies play in helping to establish and coordinate multi sectoral funding partnerships Novel approaches to science philanthropy are also considered including the emergence of crowdfunding and the development of new institutional mechanisms to advance scientific research The discussion concludes with an imaginative look into the future outlining a series of lessons learned that can guide how new and established science philanthropies operate and envisioning alternative scenarios for the future that can inform how science philanthropy progresses over the coming decades This book offers a major contribution to the advancement of philanthropic investment in science and technology Thus it will be of considerable interest to researchers and students in public policy public administration political science science and technology studies sociology of science and related disciplines   University Audit Cultures and Feminist Praxis Órla Meadhbh Murray,2025-04-23 Being REF able The impact agenda The student experience University audit culture has infiltrated academic life but how should we respond Drawing on a five year Institutional Ethnography of UK universities the author provides a feminist take on the neoliberal university and abolitionist reflections on audit culture For feminist and other critical academics the interpretative power involved in audit processes provides an opportunity to collectively challenge and subvert re read and re write institutions This book challenges the myths and misinterpretations around how academic audit processes work arguing that if we are complicit then we have agency to do them differently   New Scientist ,2000   **The Chemical Engineer** ,2009   How to Succeed as a Scientist Barbara J. Gabrys,Jane A. Langdale,2011-11-03 This unique practical guide for postdoctoral researchers and graduate students explains how to build and perfect the necessary research tools and working skills to build a career in academia and beyond It is based on successful training workshops run by the authors first it describes the tools needed for independent research from writing papers to applying for academic jobs it then introduces skills to thrive in a new job including managing and interacting with others designing a taught course and giving a good lecture and it concludes with a section on managing your career from how to manage stress to understanding the higher education system Packed with helpful features encouraging readers to apply the theory to their individual situation the book is also illustrated throughout with real world case studies to enable readers to learn from others experience It is a vital handbook for everyone seeking to make a successful scientific career   Becoming a Successful Early Career Researcher Adrian Eley,Jerry Wellington,Stephanie Pitts,Catherine Biggs,2012-08-21 Not that long ago there were fairly clear divisions between researchers at different stages throughout their career starting with doctoral students then progressing to postdoctoral workers and finishing with academic staff However more recently the term Early Career Researcher ECR has been introduced partly as a response to their growing importance which has been reflected by their increased respect and status shown by national international and funding bodies There are several common features of an ECR s job including the need to establish a professional identity and develop into an independent researcher competing for grants and increasing one s output of research publications this book offers proven practical advice to help ECRs kick start a

successful academic career With advice on Choosing research topics Making best use of a Research Supervisor Mentor Developing your research writing Getting published journals and books Writing a research grant fellowship Becoming a supervisor Becoming a teacher and Developing your career This guide will help academics at the start of their career no matter what discipline they are engaged in Arts Humanities Sciences or Social Sciences For example in sciences and engineering ECRs are commonly part of a large research team and often have to work in collaborative groups requiring strong interpersonal skills but can lead to tension in the interaction with one s supervisor or mentor In contrast in the arts and humanities and perhaps the social sciences an ECR is more likely to be an independent scholar with a requirement to work alone leading to a different type of relationship but not necessarily any less stressful with one s supervisor or mentor Using case studies from across the subject areas to illustrate key points and give suitable examples this vital guide will help all early career academics   Mathematics Today ,2004
