**change** Aragie, Emerta,Gebretsadik, Yohannes,2024-01-16 The Ethiopian economy relies predominantly on rainfed agriculture for income generation export earnings and rural livelihoods However the frequency and intensity of extreme ago

climatic events projected by climate scenarios suggest considerable and growing risks from climate change to the country's agricultural food systems and the overall economy. This study assesses the economic impacts of recurrent climate shocks on the Ethiopian economy to 2040. The results indicate that recurrent climate shocks will lead to a reduction in Ethiopia's cumulative GDP from 2020 to 2040 compared to a no climate change baseline. Specifically, extreme weather events could cumulatively cost Ethiopia up to 17 percent or US \$34.3 billion in GDP between 2020 and 2040 compared to a no climate change baseline. The weight of the economic loss is concentrated in the agricultural production sector, with rural households and poorer households in urban areas being worst affected. Strategic investments in irrigation infrastructure and in hydroelectricity generation are found to be effective in mitigating some of the damage caused by recurrent climate variability.

**Governing Natural Resources for Africa's Development** Hany Besada, 2016-09-13. Bringing together some of the world's leading thinkers and policy experts in the area of natural resource governance and management in Africa, this volume addresses the most critical policy issues affecting the continent's ability to manage and govern its precious resources. The narrative of the book is solutions driven, as experts weigh in on specific issues within the context of Africa's natural resource governance and offer appropriate policy recommendations on how to best manage the continent's resources. This is a must read for government policy makers in industrialized economies and more importantly in Africa and emerging economies as well as for academic researchers working in the field, extractive companies operating on the continent, extractive industry and trade associations, and multilateral and donor aid institutions.

*Tourism Management, Marketing, and Development* Marcello M. Mariani, Dimitrios Buhalis, Wojciech Czakon, Ourania Vitouladiti, 2016-04-29. Companies and destinations in the tourism sector are confronted with increasing managerial challenges and have to deal with a competitive, turbulent, and fast-changing environment. The understanding that both tourism companies and destinations endowed with the best assets, natural and cultural, cannot survive the escalating international competition without good managerial practices has provided significant momentum for the development of the disciplinary field of tourism management in the last three decades. This volume recognizes the relevance of travel tourism and tourism activities as major economic drivers in the contemporary global economy, with a specific focus on performance strategies and sustainability. It is the collective intellectual effort of a number of international scholars who cultivate original research on tourism management from a variety of theoretical perspectives. Together, they outline the importance for tourism companies and destinations to achieve and maintain a sustained competitive advantage by embracing sustainability and a Triple Bottom Line (TBL) approach to performance.

Bandung, Global History, and International Law Luis Eslava, Michael Fakhri, Vasuki Nesiah, 2017-11-30. In 1955 a conference was held in Bandung, Indonesia, that was attended by representatives from twenty-nine developing nations. Against the backdrop of crumbling European colonies, Asian and African leaders forged a new alliance and established anti-imperial principles for a new world order. The conference captured the popular imagination across the Global South. Bandung's larger

significance as counterpoint to the dominant world order was both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements diplomatic efforts institutional experiments and heterodox visions of the history and future of the world This book explores what the spirit of Bandung has meant to people across the world over the past decades and what it means today Experts from a wide range of fields show how despite the complicated legacy of the conference international law was never the same after Bandung Cities of Change – Addis Ababa Marc Angélil, Dirk Hebel, 2016-05-24 Addis Ababa is one of the fastest transforming environments on the globe and a prototype of an emerging territory What can architecture and urban design as disciplines contribute to such transformation According to which criteria can processes of the kind encountered in Addis Ababa be evaluated And how can all of this be steered Aiming to identify sustainable strategies rather than upholding an a priori vision of an ideal city the publication acknowledges the heterogeneous conditions of urban territories The book highlights questions of method and procedure that can be transferred to other cities of change This revised edition covers recent developments such as the increasing influence of China in African countries or the chances of high density low rise developments *The short-term impact of COVID-19 on Ethiopia's economy through external sector channels: An economywide multiplier model analysis* Aragie, Emerta, Taffesse, Alemayehu Seyoum, Tamru, Seneshaw, 2020-12-09 The COVID 19 pandemic is expected to considerably affect the Ethiopian economy directly and indirectly due to global shocks and to the different restrictive preventative measures the country is taking We analyze these economic effects using multisector economywide income multiplier models built on the two latest Social Accounting Matrices SAMs developed for Ethiopia Three external sector channels are the focus of the analysis commodity exports strategic imports and remittances Results indicate that in the absence of any policy responses the Ethiopian economy is expected to experience a loss of approximately 4.3 to 5.5 percent of its annual GDP due to exports strategic imports and remittances that are one third lower relative to the no COVID situation over a period of six months This translates into estimated reductions in labor income of between 4.2 and 5.2 percent The SAM multiplier model estimates also imply that these negative shocks lead to household income losses that amount to between 3.9 and 6.4 percent In particular the urban poor will be the most affected as they lose real incomes in the range of 6.6 to 8.5 percent These income losses are estimated to result in a 3.5 percentage point rise in the national poverty headcount Migrant Transnationalism Özge Bilgili, Marta Bivand Erdal, 2025-07-22 This open access short reader provides a compelling introduction to research on migrant transnationalism The short reader focuses on the significant area of remittances in financial terms However attention is also paid to political social cultural and religious transfers and exchanges underscoring the salience of the wide range of ties that are maintained across borders Increasingly such ties are sustained through virtual and technology facilitated modes of interaction Drawing on established and recent empirical research from across the globe in dialogue with scholars of migrant transnationalism the book offers an overview of approaches conceptual tools thematic areas and methods

of investigation. Thus, this short reader sheds light on the fundamentals of existing knowledge on migrant transnationalism. What are the key questions in migrant transnationalism research today? How does a transnational perspective deepen our understanding of migration, social mobility, diversity, inclusion, and development? As a source for researchers, students, and policy makers, this short reader is essential reading which shows why looking at the world through a transnational lens adds value for anyone interested in migration and social change.
