 Management* Jacob W. Chikuhwa,2013-05-01 Present day enterprises need insights into markets customers and their own
 internal processes faster than their competitors to capitalise on opportunities and to deliver sustainable business
 performance To do this businesses must learn to cope with the high volume and velocity of real time structured and
 unstructured data in different formats In covering the fields of manpower development accounting procedures and data
 processing a middle of the road analysis has been made to include those overlapping developments in business studies
 Disciplines like accountancy and electronic data processing frequently have unavoidable use in commerce and industry A
 Handbook in Business Management examines organisation and manpower management and reflects on their significant role
 in the arena of business management The objective with manpower management is to distribute personnel to activities where
 their talents are required and are best utilised In financial control the book examines both the technical and managerial
 approaches The technical approach is concerned with measurement where an analysis is made as to whether resources are
 being assigned to the right categories and whether generally accepted accounting principles are being followed And the
 managerial approach is to understand and interpret what the financial figures mean Critically all managers should take
 responsibility for financial management and should not assume that this falls within the remit of the accounts team alone
 Under data processing concepts the book takes an overview of the availability continuity and security of data in public and
 private concerns An efficient data processing system makes it possible to adjust the financial situation of a business before it
 gets out of hand by adjusting income distribution and combating organisation and manpower inefficiency This book offers to
 the professional student and corporate executive a preliminary survey of the fields of manpower development accountancy
 and electronic data processing while the start up entrepreneur may find in its pages something to stimulate reflection upon
 those larger issues in business management **MBA in Finance - City of London College of Economics - 10 months -
