Clive's SOAP Notes

Subjective Data

Clive is a 57 year old man who started speech therapy last week following a stroke 8 weeks ago. He continues to struggle with aphasia and dysarthria post-discharge. Clive lives with his supportive wife, Maureen. This is Clive's second home speech therapy visit. First session 1 week ago focused on education and giving some simple home exercises.

Objective Data

Clive reports that since last visit he has been practicing having short conversations with his wife in front of the mirror 3 x per day. Both note that this helps with clearer articulation and proper pitch, but word finding remains a challenge.

Struggled to do prescribed tongue exercises and word association games. When asked why, Clive and his wife identified fatigue and being overwhelmed by visits from other health professionals as the main challenges. This was evident during the session, where Clive's speech clarity and focus deteriorated after about 10 minutes of conversation.

Assessment

Clive appears to have settled in well at home post discharge. Still requires ongoing speech input for dysarthria and aphasia, but the pace of therapy will need to be balanced with his other commitments.

Plan

Clive and his wife agreed to continue with mirror speaking 3 x per day.

Maureen will prompt tongue strengthening exercises or word association games if/when she senses Clive has the stamina.

Therapist to discuss feelings of overwhelm due to frequency of visits with the rest of the MDT.
