Stephen H. Kaisler,2020-10-22 This volume describes General Electric Corporation s venture into developing second and
third generation mainframe computer systems The General Electric Corporation GE which began its life as the Edison
Electric Co was long involved in electrical appliances and industrial machines It was also a founder of the Radio Corporation
of America which eventually became one of its competitors and developed many electrical systems in order to control
different types of industrial machines Its breakthrough into computing came with its winning bid to provide the computing
systems for the Electronic Recording Method of Accounting system developed for the Bank of America by the Stanford
Research Institute The success of this project led GE to develop the GE 200 series which was the foundation for commercial
timesharing The GE 235 was selected by Dartmouth for its Dartmouth Time Sharing System DTSS an innovative academic
time sharing system BASIC was developed on the GE 235 computer system under DTSS GE enhanced it to develop its Mark II
III Time Sharing System apparently the first commercial time sharing service in the world GE develop the GE 300 400
systems for industrial process control The GE 600 series replaced the GE 200 series and demonstrated innovation in time
sharing systems The GE 645 was selected to host Multics which was developed by MIT However GE felt that it could not
compete in computing against IBM Univac and other mainframes competitors so it folded its tent and sold its Computer
Division to Honeywell Inc Nevertheless GE will be remembered for many innovations which continue to be used in modern

The

Harvest Story Robert T. Rhode,2001 The Harvest Story depicts the life of rural American threshermen This collection of first person narratives chronicles the eyewitness accounts of people who threshed grain with steam engines The book selects anecdotes from over 50 volumes of material published in The Iron Men Album Magazine from 1946 until 2001 and arranges them in a coherent recitation The result is a story of hard honest work of heartfelt cooperation and of triumph not unmarred by tragedy Readers hear the recollections of those who pitched the bundles of grain onto the horse drawn wagons unloaded these bundles into the threshing machine and saw the stream of clean wheat cascade from the grain auger Readers encounter the wit and humor that characterized yesteryear s harvests They learn about the vast industries that supported the agricultural enterprise and they discover the dangers posed by mechanical equipment The Harvest Story concludes by examining the birth and development of a movement to rescue the agrarian past from oblivion This book captures authentic voices from the era of steam powered threshing and offers readable interpretation and explanation including detailed appendices
