*Low Vision Matters* Laura Stevens, MSci, Thomas Blackman, 2025-01-31 According to the Centers for Disease Control and Prevention CDC over seven million people in the US alone suffer from severe vision loss or blindness In the past low vision was truly a life altering condition Those seemingly everyday tasks that were once so simple instead became difficult whether one had to work cook read drive go out to shop or even turn on a light switch one s world had been completely turned upside down Today however things have begun to change With the revolution of Artificial Intelligence AI already underway many of the major barriers caused by diminished or fully lost vision have been lessened or completely eliminated In *Low Vision Matters* authors Laura Stevens and Thomas Blackman provide a comprehensive guide to all the aids and equipment now available along with important practical advice to those who are vision challenged The book is divided into two parts Part One focuses on the day to day activities that low vision can affect from safety in your home or traveling outside to the handling of finances

or one's home entertainment system. It discusses the latest technologies that can enable a person with eyesight problems to turn on a light, start a dishwasher or even answer a phone through the use of oral commands and that's just the tip of the iceberg. Part Two then provides a breakdown of the various kinds of helpful vision aid products now available. Because the authors understand the costs involved in purchasing such equipment, they include the names of those organizations and associations in an extensive Resources section along with various other crucial contacts about which those with low vision and their loved ones and caretakers need to know. *Times* have changed. *Low Vision Matters* provides a wealth of information that can vastly improve the daily life of a person living with vision loss or blindness.
