Gehl 880 Manual:

Manual of Cardiac Surgery B.J. Harlan,A. Starr,F.M. Harwin,2012-12-06 difficult to represent it as the surgeon sees it and to understand the anatomy which is not always visible In part this was accomplished by painting on both surfaces of transparent paper to create the illusion of looking through superficial layers to the deeper structures A combination of color media including colored pencil graphite carbon pastels and transparent and opaque watercolors enabled me to convey the field with minimal loss of reality or dimension Of equal importance was the availability for every illustration of direct surgical observation surgical photographs fresh specimens and the surgical instruments The sequence of creation was first the discussion of desired illustrations then a rough sketch consultation with the surgeons finished pencil drawing another consultation and finally the color rendering These color renderings were then checked against actual surgery for accuracy in representation of tissues instrumentation tissue responses to manipulation and consistency of representation From these processes evolved a technique that facilitated the flow of information in logical sequence from one step to the next and from one procedure to another always focusing the attention of the audience toward what is pertinent and away from the extraneous
