[Wired TV](#) Denise Mann, 2014-02-11 This collection looks at the post network television industry's heady experiments with new forms of interactive storytelling or wired TV that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular participatory Web 2.0 companies like Facebook YouTube and Twitter Contributors address a wide range of issues from the networks' sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational corporate conglomeration on entrepreneurial creativity With essays from such top scholars as Henry Jenkins John T. Caldwell and Jonathan Gray and from new and exciting voices emerging in this field Wired TV elucidates the myriad new digital threats and the equal number of digital opportunities

that have become part and parcel of today's post network era. Readers will quickly recognize the familiar television franchises on which the contributors focus including *Lost*, *The Office*, *Entourage*, *Battlestar Galactica*, *The L Word* and *Heroes* in order to reveal their impact on an industry in transition. While it is not easy for vast bureaucracies to change course, executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups: members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities; by incorporating social media members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era; members of the Madison Avenue advertising community who were eager to rethink ad supported content; and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series. In the aftermath of the lengthy Writers Guild of America strike of 2007-2008, the networks clamped down on such collaborations and began to reclaim control over their operations, locking themselves back into an aging system of interconnected bureaucracies, entrenched hierarchies, and traditional partners from the past. What's next for the future of the television industry? Stay tuned or at least online. Contributors: Vincent Brook, Will Brooker, John T. Caldwell, M. J. Clarke, Jonathan Gray, Henry Jenkins, Derek Johnson, Robert V. Kozinets, Denise Mann, Katynka Z. Martineau, and Julie Levin Russo.

Bewitched Again Julie D. O'Reilly, 2013-07-25. Starting in 1996, U.S. television saw an influx of superhuman female characters who could materialize objects like Sabrina the Teenage Witch, defeat evil like Buffy the Vampire Slayer, and have premonitions like Charmed's Phoebe. The extraordinary abilities of these women showed resistance to traditional gender roles, although these characters experienced infringements on their abilities in ways superpowered men did not. Supernaturally powerful women and girls have remained on television, including the heavenly connected Grace of *Saving Grace*, telepathic Sookie of *True Blood*, and magical Cassie of *The Secret Circle*. These more recent characters also face numerous constraints on their powers. As a result, superpowers become a narrative technique to diminish these characters, a technique that began with television's first superpowered woman, Samantha of *Bewitched*. They all illustrate a paradox of women's power: are these characters ever truly powerful, much less superpowerful, if they cannot use their abilities fully? The superwoman has endured as a metaphor for women trying to have it all, therefore the travails of these television examples parallel those of their off-screen counterparts.
