Beginning GIMP Akkana Peck, 2006-11-21 Beginning GIMP From Novice to Professional explains how to use the open source image manipulation program GIMP version 2.4 You'll learn how to install GIMP on Windows Linux and MacOS X platforms Once

you've installed the application you'll learn about the interface and configuration options and then jump into a quick and simple project to familiarize yourself even further. With four color graphics and screenshots throughout you'll learn how to prepare camera images for display on web pages including functions like rescaling, cropping, and balancing color. The book also explains with great detail how to utilize layers, paths, and masks. You'll also learn how to draw lines and shapes, use patterns and gradients, and even create your own brushes, patterns, and gradients. Touch-ups are covered thoroughly, how to smudge away blemishes, fix red eye, and stitch panoramic images. You'll even learn how to tap into the powerful filters, effects, and plug-ins that are available and automate tasks using scripts. The entire book is laid out in a project-based manner so as you progress through it, numerous projects help solidify your newly acquired abilities.

Astrophotography Unleashed

Richard Fairman, 2015-04-12. Astrophotography is a specialised type of photography that entails recording images of astronomical objects and large areas of the night sky. The first photograph of an astronomical object, the Moon, was taken in 1840, but it was not until the late 19th century that advances in technology allowed for detailed stellar photography. You do not need your own telescope or digital camera to take beautiful astronomical photographs. The section 'Acquiring Images' takes you step by step how to acquire images via free or low-cost remote telescopes. This book is aimed at those with little or no prior knowledge of astrophotography. You may be one of the many who have found the subject too complex or have achieved disappointing results. This book's step-by-step tutorial style will allow anyone to acquire, process, and display astronomical images of a very high quality. Where possible, jargon is dispensed with and replaced with understandable language and procedures.

The LITA Guide to No- or Low-Cost Technology Tools for Libraries Breanne A. Kirsch, 2018-02-13. The LITA Guide to No or Low Cost Technology Tools for Libraries provides a practical guide on how to find and use technology tools for a variety of purposes in libraries and more broadly in education. Each topic showcases two technology tools in detail and discusses additional tools and provides examples of how librarians or educators are using them in libraries and schools. Types of tools covered are: Video creation tools such as PowToon and Animaker can be used to create animated videos to tell patrons about a new service or teach students about search strategies. Screencasts includes tools like Jing or Screencast O Matic which can be used to show how to use a new library database or service. Collaboration tools including tools such as Padlet or Lino. It can be used for student collaboration or teamwork with colleagues and sharing project ideas quickly and easily. Assessment tools such as Quizizz and Kahoot allow for gamified assessment of student or patron knowledge.
