Management Juan Gabriel Cegarra,2012 Augmented Corporate Valuation Roberto Moro-Visconti,2022-04-23 Standard corporate evaluation approaches are improved by trendy innovation especially as it concerns technological scale up and environmental issues such as digital networking or ESG compliance Whereas traditional firm appraisal follows institutional guidelines and best practices frontier research still must define the boundaries of these trendy issues linking a strong theoretical background to practical advances that still need fine tuning This book written by an academic who is also a senior consultant combines theoretical rigor with practical insights providing an innovative framework for researchers evaluators managers and practitioners *Recent Trends In Transfer Pricing Intangibles, GAAR and BEPS* Ravikant Gupta,2017-06-15

About the book The growing importance of the intangible assets in the global economy coupled with expanding international intra firm trade has meant that transfer pricing issues concerning intangibles have assumed critical importance for both the Multi National Enterprises as well as Tax authorities The identification accounting valuation of intangibles is a challenging and evolving field This volume details the various such issues and concerns from both industry and revenue perspective Further the contemporary issues of digital economy tax planning BEPS GAAR have also been extensively dealt with Key features Explains in detail the meaning of various types of intangibles as defined in Income Tax Act Discusses the various possible methodologies for valuing the intangibles including the typical and residual methods Accounts for all the relevant changes suggested by the OECD in the BEPS Action Point 8 10 report regarding intangibles Valuation of Highly Uncertain as well Hard to Value Intangibles Relevant Features of and taxation challenges posed by Digital economy Various possible techniques of Tax Planning adopted by the Multi national Enterprises All the BEPS Action Point Reports along with recommendations as adopted globally as well as in India including Thin Capitalisation PoEM Equalisation Levy amended DTAAs with Mauritius Cyprus Singapore Updated upto Finance Bill 2017 India Transfer Pricing Aspects of CCAs Intra group Services Business Restructuring including issue of indirect transfers Discussion on General Anti Avoidance Rules to be implemented in India from 01 04 2017 Famous and important global and Indian case laws with regard to intangibles Detailed discussion on issue of AMP expenses marketing intangibles

Rescue of Business in Europe Bob Wessels,Stephan Madaus,European Law Institute,2020-01-30 This edited volume is based on the European Law Institute s project The Rescue of Business in Insolvency Law which ran from 2013 to 2016 The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses Although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures

Innovation and Market Value. The Case of Tourism Enterprises Dawid Szutowski,2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered

innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm s innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company s value It covers all the aspects of a company s activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises

Valuing Data Dewey E. Ray, 2018-05-25 The past decade has seen a dramatic increase in the amount and variety of information that is generated and stored electronically by business enterprises Storing this increased volume of information has not been a problem to date but as these information stores grow larger and larger multiple challenges arise for senior management namely questions such as How much is our data worth Are we storing our data in the most cost effective way Are we managing our data effectively and efficiently Do we know which data is most important Are we extracting business insight from the right data Are our data adding to the value of our business Are our data a liability What is the potential for monetizing our data and Do we have an appropriate risk management plan in place to protect our data To answer these value based questions data must be treated with the same rigor and discipline as other tangible and intangible assets In other words corporate data should be treated as a potential asset and should have its own asset valuation methodology that is accepted by the business community the accounting and valuation community and other important stakeholder groups Valuing Data An Open Framework is a first step in that direction Its purpose is to Provide the reader with some background

on the nature of data Present the common categories of business data Explain the importance of data management Report the current thinking on data valuation Offer some business reasons to value data Present an open framework along with some proposed methods for valuing data The book does not aim to prescribe exactly how data should be valued monetarily but rather it is a starting point for a discussion of data valuation with the objective of developing a stakeholder consensus which in turn will become accepted standards and practices

Author note boxes throughout the publication draw on Trugman's veteran practical experience to identify critical points in the content. Suitable for all experience levels, you will find valuable information that will improve and fine tune your everyday activities.

Resistance to Changes in Financial Reporting Standards Edel Lemus, 2016-08-17

This book investigates current resistance to the ongoing change from US Generally Accepted Accounting Principles (GAAP) to International Financial Reporting Standards (IFRS). 138 countries have thus far adopted IFRS as a singular accounting language, while the Securities and Exchange Commission (SEC), the Financial Accounting Standard Board (FASB) and the International Accounting Standard Board (IASB) have determined that IFRS should be adopted optionally in the United States by 2016. The book shows that IFRS should act as a singular accounting language which will promote high transparency and a better economic position in the world financial market.

Goodwill Value Guide 2015 Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has been apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is really remarkable.
