

Human Freedom

What it means to be free...

1. When we exercise your freedom, the action that results makes a mark or a change in the world. And in making these changes, we ourselves are changed from our very core.
2. We are not complete when we say that we are free because we will always have unrealized possibilities.

Naturalism

1. Naturalism understands the material universe as a unified system. In it, everything is shaped completely by physical, biological, psychological, social and environmental processes.
2. Humans are a part of this material universe. Everything including humans is part of a cause and effect chain.
3. Everything must be explained by science
4. The human self is not an intending self but a genetically pre-programmed organism
5. When it comes to understanding humans, it is all in the genes.
6. Freedom is viewed as an illusion due to this. If DNA defines who you are, then your genes rule supreme.

Religious Determinism

1. Predestination means God has already determined the course of the world and the actions and deeds of every individual.
2. Puritans and Calvinists believe that salvation sin has so totally depraved humans that humans are born and live their entire lives deserving eternal damnation.
3. Providence is the protective care of God or of nature as a spiritual power.

Social Determinism

1. The unconscious mind is human behavior is driven by unconscious impulses based on repressed memories and desires
2. You become neurotic and are not responsible for your actions.
3. Neurotic means unstable
4. Freud recognized that people can use the emotional power of repressed memories and desires for right action by channeling this energy creatively and less neurotically - called this "sublimation"
5. *****
6. The superego persuades the ego to choose moral behavior and strive for perfection by offering punishments and rewards.
