- 1a) A rise in price level!
- b) A shift to the right, and increase in aggregate demand because

Aggregate Demand = Consumer Expenditure + Government Expenditure + Investment Expenditure + Net Exports

2a) 5% of \$9800 - 6% of \$8000 = 490 - 480 = \$10million

 b) (i) Because an increase may mean that imports outweigh exports making Net Exports a negative figure (creating a deficit)

(ii) Whilst imports from China may increase, imports from other countries (e.g. India, Egypt, UAE, etc.) may decrease, meaning that overall imports have decreased or at least negating the effect of rising imports from China. In the same way, exports to other countries (including China) may increase, also negating the effect of increasing Chinese imports). It also depends on by how much imports from China increase, because a small increase may not have a large enough effect to make cost of Imports larger than revenue from Exports.

The exchange rate is determined by the equilibrium between the demand for that currency and its supply.

b) The value of the Sudanese pound decreased because you can buy fewer dollars with the same number of Sudanese pounds.

4a) The high rates of illiteracy means that potential employers may not wish to take on many of the workers meaning they are unable to earn a wage and therefore unable to buy things, reducing demand for products and reducing production in the country, lowering demand for workers which creates further cyclical unemployment.

Human-Centred Economics Richard Samans, 2023-12-02 This open access book examines the chronic underperformance of economies with respect to inclusion sustainability and resilience It finds that the standard liberal economic growth and development model has evolved over the past century in a fundamentally unbalanced manner that underemphasizes the crucial role of institutions legal norms policy incentives and public administrative capacities in translating market based growth in the production of goods and services into broad and sustainable gains in social welfare at the household level Correcting this imbalance of emphasis in economic theory and policy between markets and institutions production and distribution and national income and household living standards is the single most important step required to transcend 20th century trickle down neoliberalism and replace it with a more human centred model of economic progress in the 21st century The book breaks new ground by integrating the principal institutional dimensions of the social contract into the heart of macroeconomic theory and presenting extensive corresponding reforms of domestic and international economic policy to refocus them on the median living standards rather than primarily aggregate wealth or GDP of nations This is the bottom line measure of national economic performance and it depends on the strength of both markets of exchange and institutions in such areas as labour and social protection financial and corporate governance competition and rents anti corruption infrastructure and basic necessities environmental protection education and skilling etc Extensive comparative data are presented demonstrating that countries at every level of economic development have ample policy space to narrow their welfare gaps their underperformance on these and other key aspects of household living standards relative to the frontier of leading policy practice in peer countries Monthly Journal of Insurance Economics ,1918 International Handbook of Accounting Education and Certification Kwabena Anyane-Ntow, 2018-03-05 This is the first work of its kind Original contributions from leading academicians practitioners and accounting associations from around the world make this handbook a unique source of information on international accounting education and certification processes A uniform format in most of the chapters allows for easy comparison between countries This volume documents the development of accounting education and practice at country and global levels studies the sensitivity of accounting education and practices to the unique socio economic needs of its environment and allows comparative studies at a time when attempts have begun to harmonize accounting education internationally Most importantly it shows how educational programmes around the world are preparing future accounting professionals to deal with the rapid technological and environmental changes of the 21st century Plain English Marian Wharton, 2022-09-04 DigiCat Publishing presents to you this special edition of Plain English by Marian Wharton DigiCat Publishing considers every written word to be a legacy of humankind Every DigiCat book has
