

5 Find out about inspections

At least ten days before work starts, the PCA must inform you about the inspections required and you must inform your builder. The builder will make arrangements with the PCA for inspections to be carried out as needed. The PCA may not be able to issue certificates for completed work if inspections are not undertaken.

6 Obtain an occupation certificate

Before you can occupy the building, you must apply for and obtain an occupation certificate from your PCA.

The PCA will inspect the completed building work to determine if it is suitable to occupy. If satisfied, they will issue an occupation certificate.

You can appeal to the Land and Environment Court if the council refuses to issue a final occupation certificate (or construction certificate), or if no decision is made after a certain period. You cannot appeal against the decision of an accredited certifier to refuse an application for a certificate.

If you believe your PCA is unreasonably delaying the release of your certificate or approval you should, in the first instance, discuss this with the PCA. If you are not satisfied after that, contact the Board for advice and assistance.

Not all accredited private certifiers can issue all of the above certificates or conduct mandatory inspections. Their authority to issue these certificates depends upon their level of accreditation. Before you engage a certifier, you should check their level of accreditation at www.bpb.nsw.gov.au.

Councils can issue all of the certificates mentioned above.

Guide For Homeowners And Building Professionals:

California Building Performance Guidelines for Residential Construction and Homeowner Maintenance Guide

, **The Home Book** David E. MacLellan, George E. Wolfson, Douglas Hansen, 2014 Every homeowner wants to protect the investment they've made in their home. As maintenance issues occur, The Home Book will become a homeowner's main reference for determining how to proceed with every condition of home ownership. With more than 380 residential workmanship guidelines in a single reference, The Home Book accomplishes what no other homeowner book has done: establish and define workmanship guidelines applicable in all 50 states. The conditions addressed have historically been issues that result in litigation between builders and homeowners. The Home Book helps to avoid litigation by assigning responsibility for each condition discussed. The Home Book is intentionally written for the layperson and clearly outlines the building guidelines that should be met during the construction or remodeling of a home. The Home Book is an extremely valuable reference for every homeowner, builder, contractor, inspector, real estate agent, and property management company.
