Fathering in India Rajalakshmi Sriram, 2018-12-30 This book

covers the underexplored subject of fathering in India It delves into the shared aspirations of men in India to nurture their children in sensitively attuned ways within the culturally prescriptive context that governs men's roles as providers and caregivers This work is based on over two decades of intensive research in India on how different groups construct and experience fatherhood and fathering under changing circumstances It unmask the heterogeneity that exists within fathering in India through conversations with fathers across diverse contexts in privileged economic situations and those in difficult home and family circumstances having children with disability single parent fathers and fathers in the military A separate section discusses fathering daughters and shared parenting Images and role models in fathering are brought alive through analysis of Hindi films the media children's literature and classical literature The conceptual analysis moves beyond the power and control dimensions commonly used to describe Indian men and fathers to highlight their resilience adaptability positive involvement and developmental trajectories This volume is for scholars researchers and practitioners in developmental psychology human development and family science sociology early childhood education and psychiatry pediatrics community medicine and allied fields

Working With Fathers in Psychoanalytic Parent-Infant Psychotherapy Tessa Baradon, 2019-02-07 Working With Fathers in Psychoanalytic Parent Infant Psychotherapy interfaces theoretical ideas about fatherhood and their incorporation into the clinical practice of psychoanalytic parent infant psychotherapy Often when a family attends parent infant psychotherapy issues of the father are eclipsed by attention to the mother who is usually the identified patient Until now relatively neglected in the literature this book attends to both the barriers to psychological work with the father and to ways in which he can be engaged in a therapeutic process In this book Tessa Baradon brings together some of the most eminent clinicians and academics in the field of parent infant psychotherapy in a layered collection of theoretical and clinical contributions She and her co discussants Björn Salomonsson and Kai von Klitzing conclude with an integration and critique of the themes presented exploring the ideas of their fellow contributors and expanding on the central themes of the work Working With Fathers in Psychoanalytic Parent Infant Psychotherapy will be of interest to mental health practitioners working with infants who will learn that each individual and the family as a system can benefit from such an inclusive approach

Grandmothering Kathleen Stassen Berger, 2019-11-04 Contemporary grandmothers are often marginalized from extended family life because social institutions and grandmothers themselves do not understand that they could be vital for working parents for overactive children for suicidal youth indeed for many of the problems of modern grandchildren The genetics and hormones of older women have designed them to be vital family members with patience and perspective that come with age and experience In addition biology helps directly via menopause The grandmother hypothesis explains that human women unlike almost any other living creature experience decades of life after menopause in order to make grandmothers available to their descendants Here Kathleen Berger explores the role of grandmothers in the lives of their grandchildren She uses real life examples to illustrate how grandmothers can best

integrate themselves into the lives of their children's families without overstepping. She explores the particular needs of each stage of childhood as they relate to grandmother involvement and input. Before a child is born, grandmothers need to attend to building a strong relationship with the future parents. In infancy, attachment and feeding are crucial. In early childhood, grandmothers need to follow the parent's lead, remembering that a parental alliance is essential. In childhood, children need to be safe but not isolated, and both bullies and victims benefit from a grandmother's support and assistance. In adolescence and emerging adulthood, grandmothers need to build direct connections and not avoid the difficult topics of sex, drugs, death, disease, and money. Throughout, elders need to learn technology, insuring that it fosters, not impedes, relationships. Problems in relationships are explained honestly and with insight. Among these are issues when three generations share a home, when parents get divorced, and when grandchildren rebel against parental authority. Throughout the work, both the joy and the complications of effective grandmothering are described. Whether you're a biological grandmother, a trusted step-grandmother, or just a warm and trusted older woman with young ones in your life, you can be a vital force in the lives of future generations.

Flourishing in Emerging Adulthood Laura M. Padilla-Walker, Larry J. Nelson, 2017. *Flourishing in Emerging Adulthood* highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development, including how young people flourish in key areas of emerging adulthood: e.g., identity, love, work, worldviews. The various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty, professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood.

Situated Fathering William Marsiglio, Kevin Roy, Greer Litton Fox, 2005-07-28. When men act as parents, they do so in diverse physical and social spaces imbued with symbolic meaning. They father in the military, overseas, on the farm, in dilapidated inner cities, immersed in ethnic neighborhoods, navigating idealized places of leisure where families go, as stepfathers in spaces where physical dimensions and family meanings intersect, as nonresident fathers managing less-than-ideal conditions, rolling across the interstate as long-haul truckers, playing catch alongside the house, managing precious family time in prison, work-release programs, as participants in community fatherhood initiatives, etc. Until now, family scholars had not explicitly theorized and focused on

how physical space shapes fathers lives A distinct volume of theoretical and empirical research Situated Fathering addresses this oversight by proposing a new framework for studying how various contingencies of physical space in conjunction with social symbolic issues affect men s identities as fathers and their involvement with children Consistent with public interest in men s efforts to be there as providers and caregivers this book explores issues associated with the barriers and supports to involvement that are part of the physical and social environment Written largely for family scholars and students it emphasizes a future oriented perspective by outlining directions for theoretically guided research in specific often gendered fathering sites

Future Families Ross D. Parke, 2013-08-28 *Future Families* explores the variety of family forms which characterize our contemporary culture while addressing the implications of these increasingly diverse family units on child development Reveals the diversity of new family forms based on the most current research on fathers same gender parents new reproductive technologies and immigrant families Illustrates that children and adults can thrive in a variety of non traditional family forms Shows the interrelatedness of new trends in family organization through the common themes of embedded families and caregiving in community and cultural contexts Features an interdisciplinary approach drawing from works in areas that include child development family studies sociology cross cultural scholarship ethnic studies biology neuroscience anthropology and even architecture Sets an agenda for future research in the area of families by identifying important gaps in our knowledge about families and parenting
