Algorithms for Memory Hierarchies Ulrich Meyer, Peter Sanders, 2003-04-07 Algorithms that have to process large data sets have to take into account that the cost of memory access depends on where the data is stored Traditional algorithm design is based on the von Neumann model where accesses to memory have uniform cost Actual machines increasingly deviate from this model while waiting for memory access nowadays microprocessors can in principle execute 1000 additions of registers for hard disk access this factor can reach six orders of magnitude The 16 coherent chapters in this monograph like tutorial book introduce and survey algorithmic techniques used to achieve high performance on memory hierarchies emphasis is placed on methods interesting from a theoretical as well as important from a practical point of view

Models and Tools for Managing Development Processes Bernhard Westfechtel, 2003-07-31 The development of products in disciplines such as mechanical electrical or software engineering is a challenging task Costs have to be reduced the ti to market has to be shortened and quality has to be improved Skilled engineers and sophisticated tools for supporting technical work are necessary prerequisites yet they are not sufficient for meeting these ambitious goals In addition the work of developers must be coordinated so that they cooperate smoothly To this end the steps of the development process have to be planned an engineer executing a task must be provided with

documents and tools the results of development activities have to be fed back to management which in turn has to adjust the plan accordingly the documents produced in different working areas have to be kept consistent with each other etc This book reports on models and tools for managing development processes It provides both a survey of the current state of the art and presents our own contributions The material covered in this book is based on research in different engineering disciplines mechanical software and chemical engineering It presents a unified view on the management of development processes in these disciplines
