Wells, 1987 *Equations* Tony G. Williams, 2011-09-01 This packet challenges students' minds with fun puzzles that develop logic reasoning skills, concentration, and confidence. Focusing on equations, each Sudoku puzzle is like a mini lesson with background discussion, strategy, and demonstration for solving each problem. After completing the algebra exercises, students are given enough data that will allow them to reason their way through the remaining cells of the Sudoku puzzle that follows. Each activity is presented on a ready-to-use reproducible master that can be easily photocopied or reproduced as a transparency for full class instruction and discussion. **Fam Inv ACT W/ANS Holt Math CS 3 2007** Holt Rinehart & Winston, 2007 **The Transposing Method of Solving Algebra Equations** Wayne R. Matson, Hoover, Dale, 2010-10-28 This book offers one proven solution to a major problem. Nationally, 90% of entering college freshmen can't solve equations. Obviously, something is wrong. The Transposing Method of Solving Equations is a far superior method than the traditional "Whatever you do to one side, you do to the other side" method taught in schools today. With The Transposing Method, you will be able to solve equations with 1/3 the steps and in significantly less time, and you will eliminate a lot of messy scratch work. The two methods are compared in the book. The book also provides a Diagnostic Test with 10 simple equations; 90% of college students can not even get 2 correct. With just a few simple rules, you will be able to solve every equation you will encounter in a typical School Algebra and/or College Algebra course. There is no difference between High School Algebra and College Algebra. Algebra is Algebra. This book is a Self Teaching Course to help you Solve ALL Equations. This book will help you NOW and be your Reference for any FUTURE Math Course. I have enjoyed collaborating with Professor Matson the past two years at KSU. Dr. Matson brings many years of teaching expertise and a wide range of related work experience, including the space program, into the classroom. His students' recent results on tests/exams were the highest that I have seen in my ten years at this University. When Dr. Matson noted a deficiency in the current textbook, he began authoring new textbooks for entry-level students. I have been proofing the textbooks and can attest to their rigor and effectiveness in helping other instructors to have the success Dr. Matson has achieved. Students would make a significant step forward in their mastery of mathematical concepts by being in the classroom with Dr. Matson and/or obtaining copies of his recently published textbooks.
