Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development Popescu, Cristina Raluca Gh., 2022-06-17 Knowledge and information have significant impacts on

individuals daily lives and activities especially when referring to the new economy and the global knowledge societies. However, the COVID 19 pandemic has caused massive disruptions in the creation of the vital inclusive global information society. Due to this change, further study on the current difficulties and best practices of creating global knowledge societies is required in order to ensure communities can continue to advance and information is shared appropriately. The Handbook of Research on Building Inclusive Global Knowledge Societies for Sustainable Development aims at providing an updated view of the newest trends, novel practices, and latest tendencies concerning building inclusive global knowledge societies for sustainable development while focusing on the benefits and the opportunities derived from the new economy and the global knowledge societies. Covering topics such as smart cities, food security, and climate change, this major reference work is ideal for policymakers, government officials, business owners, managers, academicians, scholars, researchers, practitioners, instructors, and students.

Wearable Sensor Technology for Monitoring Training Load and Health in the Athletic Population Billy Sperlich, Hans-Christer Holmberg, Kamiar Aminian, 2020-02-13. Several internal and external factors have been identified to estimate and control the psychobiological stress of training in order to optimize training responses and to avoid fatigue, overtraining, and other undesirable health effects of an athlete. An increasing number of lightweight sensor-based wearable technologies (wearables) have entered the sports technology market. Non-invasive sensor-based wearable technologies could transmit physical, physiological, and biological data to a computing platform and may provide, through human-machine interaction (smart watch, smartphone, tablet), biofeedback of various parameters for training load management and health. However, in theory, several wearable technologies may assist to control training load, but the assessment of accuracy, reliability, validity, usability, and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health.
