Corruption Bertram I. Spector, 2021-12-19 Many anti corruption efforts have had only a minimal effect on curbing the problem of corruption This book explains why that is and shows readers what works in the real world in the fight against corruption and why Counter corruption initiatives often focus on the legal institutional and contextual factors that facilitate corrupt behavior but these have had only nominal impacts because most of these reforms can be circumvented by government officials powerful citizens and business people who are relentless in their quest for self interest This book argues

that instead we should target the key individual and group drivers of corrupt behavior and through them promote sustainable behavioral change Drawing on over 25 years of practical experience planning designing and implementing anti corruption programs in over 40 countries as well as a wealth of insights from social psychological ethical and negotiation research this book identifies innovative tools that target these core human motivators of corruption with descriptions of pilot tests that show how they can work in practice Anti corruption is again becoming a priority issue prompted by the emergence of more authoritarian regimes and the public scrutiny of government responses to the COVID 19 pandemic Straddling theory and practice this book is the perfect guide to what works and what doesn't and will be valuable for policymakers NGOs development practitioners and corruption studies students and researchers
