

Human Body Cellular Communication

Base your answer to the next 3 questions on the diagram of nerve cells below and on your knowledge of biology.

1. In the space below, sketch a chemical molecule that might be released from nerve cell A and be recognized and bind to area I of nerve cell B.

2. Describe what would happen if a drug molecule shaped like ■ were introduced into this nerve pathway.

—Nothing, the shape would not be accepted by receptors on B.

3. Identify one substance, other than the secretions from nerve cells, used in cell communication.

— hormones — antigens — receptor molecules

Base your answer to the next 2 questions on the information below and on your knowledge of biology.

Cell communication involves a cell detecting and responding to signals from other cells. Receptor molecules play an important role in these reactions. Human cells have insulin receptors that are needed for the movement of glucose out of the blood.

4. State one way that the shape of the insulin receptor is related to its role in cell communication.

— The shape of the receptor molecule is specific for a specific molecule.

5. A typical human liver cell can have over 90,000 insulin receptors. If a genetic error occurred, resulting in each liver cell in a person having only 1,000 insulin receptors, what specific effect would this have on the liver cells?

— The liver would receive less insulin.

Living Environment Review Answer Key:

Let's Review Regents: Living Environment Revised Edition Barron's Educational Series, Gregory Scott Hunter, 2021-01-05
Barron's Let's Review Regents Living Environment gives students the step by step review and practice they need to prepare for the Regents exam. This updated edition is an ideal companion to high school textbooks and covers all Biology topics prescribed by the New York State Board of Regents. This edition includes One recent Regents exam and question set with explanations of answers and wrong choices. Teachers' guidelines for developing New York State standards based learning units. Two comprehensive study units that cover the following material: Unit One explains the process of scientific inquiry including the understanding of natural phenomena and laboratory testing in biology. Unit Two focuses on specific biological concepts including cell function and structure, the chemistry of living organisms, genetic continuity, the interdependence of living things, the human impact on ecosystems and several other pertinent topics. *Let's Review Regents: Living Environment 2020* Gregory Scott Hunter, 2020-06-19.
