and processes this authoritative work is designed to help investigators gain a more favorable edge in obtaining support for their research proposals. It offers practical insights into a broad spectrum of the basic and clinical research interests of the 21 NIH research granting components and identifies the various mechanisms of support. Descriptions, guidance, and advice are also provided on specific areas such as how to prepare a grant application, the peer review system, the procedures leading to award decisions, the responsibilities of the NIH staff in managing the review and referral of applications, and managing grant programs. Other extramural policies and procedures are covered such as the appeals system, animal welfare, the privacy act, and research involving human subjects. Legislation, funding, and the NIH budget are also discussed. Written by two former senior level managers at the National Institutes of Health and current consultants to several USPHS agencies, *IA Guide to NIH Grant Programs R* is a valuable reference source for members of the biomedical and behavioral research community.

Crafting a Class Elizabeth A. Duffy, Idana Goldberg, 2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955. Through the 1950s, most colleges in the United States enrolled fewer than 1000 students, nearly all of whom were white. Few colleges were truly selective in their admissions; they accepted most students who applied. In the 1960s, as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded, many more students began to apply to college. For the first time, liberal arts colleges were faced with an abundance of applicants, which raised new questions: What criteria would they use to select students? How would they award financial aid? The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation. The colleges' answers also proved crucial to their futures, as the years since the mid 1970s have shown. When the influx of baby boom students slowed, colleges began to recruit aggressively in order to maintain their class sizes. In the past decade, financial aid has become another tool that colleges use to compete for the best students. By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges, *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic, economic, political, and social forces. Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio. At each college, they not only collected empirical data on admissions, enrollment, and financial aid trends, but they also examined archival materials and interviewed current and former administrators. Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s. *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States.
