Cortada, 2016-03-16 All the Facts presents a history of the role of information in the United States since 1870 when the nation began a nearly 150 year period of economic prosperity and technological and scientific transformations James Cortada argues that citizens and their institutions used information extensively as tools to augment their work and private lives and that they used facts to help shape how the nation evolved during these fourteen decades He argues that information's role has long been a critical component of the work play culture and values of this nation and no more so than during the twentieth century when its function in society expanded dramatically While elements of this story have been examined by thousands of scholars such as the role of radio newspapers books computers and the Internet about such institutions as education big business expanded roles of governments from town administration to the state house from agriculture to the services and information industries All the Facts looks at all of these elements holistically providing a deeper insight into the way the United States evolved over time An introduction and

region whose identity is still under construction Latin America and the Caribbean immersed in a social economic ecological and political crisis whose roots originate historically and politically in colonialism and in the prevailing model of capital accumulation For the first time insights and practical experiences on restoration are gathered from most Latin American and Caribbean countries Furthermore this book offers a social approach to restoration which will likely become preponderant in this field and in this region The authors claim that a Latin American knowledge of restoration is under construction and that this discipline can be a significant tool to empower local populations which might in turn lead to a collective action of change Case studies from 11 countries of the region were compiled involving multiple voices that emerge beyond generalist principles and with a bottom up approach The main idea of the book is to open a debate about the identity of ecological and social restoration in this region This book is targeted to restoration specialists volunteers environmental managers researchers politicians and NGOs working on the complexity of socioecological restoration in a region with unavoidable social problems It is intended for people with similar concerns to those of the chapters authors This work tries to integrate a movement on the rise almost silent born with its own narratives of successes and failures that do not hinder its development Finally the determination and commitment of Latin American and Caribbean social actors to restore not only natural values but also social ethical and cultural ones is remarkable
