## Module 2 Section 5 Shark Dissection:

**Additions to a Revision of the Shark Genus *Carcharhinus*** J. A. F. Garrick, 1985 Features of the valid nominal species of *Aprionodon* Gill *isodon* Valenciennes and *Hypoprion* M ller and Henle *hemiodon* Valenciennes *macloti* M ller and Henle and *signatus* Poey plus those of a previously unrecognized species here described as *Carcharhinus leiodon* n sp are examined and compared with those of *Carcharhinus* Blainville Features studied include morphometrics vertebral numbers and other vertebral characteristics tooth numbers color pattern and some other aspects of external morphology It is concluded that on these features *C Leiodon* n sp is entirely encompassed within the parameters of *Carcharhinus* and that although *A isodon* H *hemiodon* H *macloti* and *H signatus* each extend the range of diversity of *Carcharhinus* in one or more features *A isodon* is not uniquely different from *Carcharhinus* and there is no common pattern of difference between the three species of *Hypoprion* and *Carcharhinus* Accordingly and because the nature of the teeth of *Aprionodon* and *Hypoprion* has been found insufficient to warrant generic distinction from *Carcharhinus* the genera *Aprionodon* and *Hypoprion* are synonymised with *Carcharhinus* A diagnosis and description are given for each of the above species The descriptions include measurements counts and line illustrations that show the whole shark in lateral view underside of head nostril and teeth The geographic distribution is summarized as are also the meager biological data available on number of embryos size at birth size at sexual maturity and maximum size *Vertebrate Dissection* Warren Franklin Walker, Dominique G. Homberger, 1992 This classic lab manual offers instructions for the dissection of representative vertebrates for any vertebrate dissection course
