Chemical Engineering Education ,2004      Plant Polyphenols Richard W. Hemingway, Peter E. Laks, 2012-12-06 This book was developed from the proceedings of the 2nd North American Tannin Conference held in Houghton Michigan June 1991 The objective of this conference was to bring together people with a common interest in plant polyphenols and to promote interdisciplinary interactions that will lead to a better understanding of the importance of these substances Another objective of this conference was to extend the tannin family by making special efforts to encourage participation by scientists outside the United States obtain more coverage of the hydrolyzable tannins and further broaden the scope of coverage from the initial concentration on forestry and forest products Comparison of the contents of this book with Chemistry and Significance of Condensed Tannins that resulted from the proceedings of the 1st North American Tannin Conference shows the degree that these objectives were met In developing the second conference care was taken to assure that this book

extends rather than duplicates the coverage of the first conference Therefore the two books should be taken together to obtain an up to date coverage of the broad area of chemistry and significance of plant polyphenols Our thanks go to the authors who so kindly contributed chapters and so patiently responded to our requests We thank the Conference Assistance Staff of Michigan Technological University for their help in planning and conducting the conference
