Rhetoric and Human Consciousness Craig R. Smith, 2017-04-12 For two decades students and instructors have relied on award winning author Craig Smith's detailed description and analysis of rhetorical theories and the historical contexts for major thinkers who advanced them He employs key themes from important philosophical schools in this well researched chronicle of rhetoric and human consciousness One is that rhetoric is a response to uncertainty The modern philosophers like the naturalists of ancient Greece and the Scholastics who preceded them tried to end uncertainty by combining the discoveries of science and psychology with rationalism Their aim was progress and a consensus among experts as to what truth is However where modernism proved ineffective rhetoric was revived to fill the breach Another significant theme is that different conceptions of human consciousness lead to different theories of rhetoric and for every major school of thought another school of thought forms in reaction Classic and contemporary examples demonstrate the usefulness of rhetorical theory especially its ability to inform and guide By providing probes for rhetorical criticism discussions also demonstrate that rhetorical criticism illustrates verifies and refines rhetorical theory Thus the synergistic relationship between theory and criticism in rhetoric is no different than in other arts Theory informs practice analysis of successful practice refines theory Smith's absorbing study has been expanded to include thorough treatments of rhetoric in the Romantic Era feminist and queer theory and historical context for the creation of rhetorical theory and its use in public address

British Infantry Battalion Commanders in the First World War Peter E. Hodgkinson, 2016-04-15 Recent studies of the British Army during the First World War have fundamentally overturned historical understandings of its strategy and tactics yet the chain of command that linked the upper echelons of GHQ to the soldiers in the trenches remains poorly understood In order to reconnect the lines of communication between the General Staff and the front line this book examines the British army's commanders at battalion level via four key questions i How and where resources were found from the small officer corps of 1914 to cope with the requirement for commanding officers COs in the expanding army ii What was the quality of the men who rose to command iii Beyond simple overall quality exactly what qualities were perceived as making an effective CO and iv To what extent a meritocracy developed in the British army by the Armistice Based upon a prosopographical analysis of a database over 4 000 officers who commanded infantry battalions during the war the book tackles one of the central historiographical issues pertaining to the war the qualities of the senior British officer In so doing it challenges lingering popular conceptions of callous incompetence as well more scholarly criticism that has derided the senior British officer but has done so without a data driven perspective Through his thorough statistical analysis Dr Peter Hodgkinson adds a valuable new perspective to the historical debate underway regarding the nature of British officers during the extraordinary expansion of the Army between 1914 and 1918 and the remarkable yet often forgotten British victories of The Hundred Days [Clearinghouse Review](#), 1991
