Freiberg,Freiberg Karen,2008-07-15 This compendium of articles about human development covers the life span considering physical cognitive psychosocial and spiritual components As you explore this anthology you will discover that many articles ask questions that have no answers However this anthology is dedicated to seekers of knowledge and searchers for what is true right or lasting To this end articles have been selected to provide you with information that will stimulate discussion and that will give your thoughts direction but no articles that tell you what to think Pref **Essentials of Patient Education** Bastable,2016-03-29 Essentials of Patient Education Second Edition prepares nurses for their increasing role in patient teaching health education and health promotion Highly revised the Second Edition focuses on the basic principles of teaching and learning by emphasizing the role of the professional nurse in educating patients and families effectively and efficiently in various healthcare settings The Second Edition explores new topics of motor learning and gender differences in the brain as well as the ethics of patient education and the legal role of the nurse as mandated by state practice The text features completely revised chapter content and updated references that provide evidence from research and theoretical foundations which substantiate content throughout the text Provided by publisher **Be a Modern Teacher with Emotional Intelligence** Alozie Eugene Iheanyi,2015-08-25 In the past ten years of pastoral vocation as a Catholic Priest I have dedicated not less than eight years in apostolates intrinsically tied to mentoring of young people and classroom teaching After completing my bachelors degree I worked for six years as a secondary school principal in Nigeria before I received the call to come over to Europe for the continuation of my ministerial experience and learning In all these years both from studies and in practical experience I have realized that education is meant to enhance the lives of people and improve them In the course of researching for my Masters degree I became aware of the concept of emotional intelligence I saw in it an apt and timely addendum to the entire course of research and to educational research in particular The fact is that human life its reality and goals is the very context inside which learning should be done and for which learning is done This is what makes education have meaning and determines its usefulness and it is only in this context that we can say that education prepares one for life and its challenges Directly or indirectly

emotional intelligence makes a contribution to preparation for living in the modern world Educational enterprise is not exclusive to the activities that take place within the four walls of a formal classroom I accept the educational learning theory which says that learning is everywhere for a conscious mind though it always needs to be tuned and guided In fact there are a huge number of para teachers such as parents coaches mentors pastors inspirers trainers and leaders who do not know the extent to which their day to day teachings and drilling of others affect the psychology of society at large This is because the teaching mentoring and coaching of such para teachers influences the emotional intelligence of their followers and learners most often in a positive way Emotional intelligence was a ground breaking theory developed by Daniel Goleman not only on to teach how best to teach and inspire but also to make an important link between the learning achievement of the classroom and success in real life situations This is called knowledge transfer in education
