edition provides a comprehensive analysis of the fundamental concepts of financial management and management accounting. The elegantly combined presentation of the various aspects of financial management and management accounting is a highlight of this text. Focusing on the core areas of financial management, basic concepts of finance, sources of finance, capital structure theories and planning, dividend policies, investment decisions, portfolio management and working capital management, as well as the areas of management accounting, changes in financial position, financial statement analysis and inter-firm comparison, budgetary control and standard costing and cost information and management decisions, the book also delves on the contemporary topics such as financial environment, corporate governance and international financial management in detail. In addition, it contains a number of case studies on various areas of finance and management accounting. The current edition has been thoroughly revised, keeping in view contemporary developments in the literature and applicable provisions of the Companies Act 2013. Apart from updating the case studies, new cases have been added to support the relevance and quality of discussion. Intended primarily for postgraduate students of commerce (M.Com) and management (MBA) with finance specialization, the book will also be highly useful for undergraduate students of Commerce and Management, students of professional courses such as CA and ICWA, as well as professionals in the fields of financial management and management accounting. The present treatise has been recommended by many Colleges, Management Institutes and Universities in India for their respective postgraduate and undergraduate commerce and management courses.

**BUSINESS ACCOUNTING AND FINANCIAL MANAGEMENT** SUBHASH CHANDRA DAS, 2013-06-03. This comprehensive and concise book critically examines the essential principles, practices and approaches to financial accounting, cost and management accounting and financial management. This book is intended for the postgraduate students of management and commerce. Besides, it is equally useful for the students of engineering and technology. The objective of this book is to assist the students and readers in developing an understanding of the theories of various branches of accounting and financial management and to integrate the knowledge with practice in evaluating the strategic management decisions. The book contains thirty-three chapters divided into three parts: Part A comprising ten chapters discusses the key principles and practices of financial accounting; Part B containing eight chapters explains various methods and techniques of cost and management accounting; Part C comprising fifteen chapters provides an insight into the numerous dimensions of financial management policies and practices. Key Features: A systematic presentation of the subject matter supported with substantial number of Examples, Diagrams and Tables for easy understanding. The topics of Accounting for Fixed Assets (Chapter 4), Depreciation Accounting (Chapter 5), Revenue Recognition (Chapter 6), Accounting for Inventories (Chapter 8) and Cash Flow Statement (Chapter 20) have been written thoroughly in accordance with the Accounting Standards (AS) issued by the ICAI. Review questions covering examination problems and their answers are given at the end of each chapter. The detailed answers are available in the Instructors Manual. An exhaustive glossary of terms has been provided to explain the core

concepts Solutions Manual is also available      **Essentials of Banking** Deborah K.
