Eureka Vacuum Manual

Eureka Vacuum Manual:

The Market Makers Peter Scott, 2017-09-15 During the twentieth century affluence both at the level of the individual household and that of society as a whole became intimately linked with access to a range of prestige consumer durables. *The Market Makers* charts the inter war origins of a process that would eventually transform these features of modern life from being luxuries to necessities for most British families. Peter Scott examines how producers and retailers succeeded in creating mass though not universal market for new suites of furniture, radios, modern housing and some electrical and gas appliances while also exploring why some other goods such as refrigerators, telephones and automobiles failed to reach the mass market in Britain before the 1950s. Creating mass markets presented a formidable challenge for manufacturers and retailers. Consumer durables required large markets. Most involved significant research and development costs. Some such as the telephone, radio and car were dependent on complementary investments in infrastructure. All required intensive marketing usually including expensive advertising in national newspapers and magazines while some also needed mass production methods and output volumes to make them affordable to a mass market. This study charts the pioneering efforts of entrepreneurs many of whom though once household names are now largely forgotten to provide consumer durables at a price affordable to a mass market and to persuade a sometimes reluctant public to embrace the new products and the consumer credit that their purchase required. In doing so Scott shows that contrary to much received wisdom there was a consumer durables revolution in inter war Britain at least for certain highly prioritised goods. The Vacuum Cleaner Carroll Gantz, 2012-10-05 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor performed mostly by women. Mechanical carpet sweepers were replaced by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors who improved vacuum cleaners as electricity became commonly available made these advances possible. Many early manufacturers failed but some such as Bissell, Hoover, Eureka and others became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago vacuum cleaners have become an integral part of modern household culture.
