Hand, 2014-02-11 In The Improbability Principle the renowned statistician David J Hand argues that extraordinarily rare events are anything but In fact they're commonplace Not only that we should all expect to experience a miracle roughly once every month But Hand is no believer in superstitions prophecies or the paranormal His definition of miracle is thoroughly rational No mystical or supernatural explanation is necessary to understand why someone is lucky enough to win the lottery twice or is destined to be hit by lightning three times and still survive All we need Hand argues is a firm grounding in a powerful set of laws the laws of inevitability of truly large numbers of selection of the probability lever and of near enough Together these constitute Hand's groundbreaking Improbability Principle And together they explain why we should not be so surprised to bump into a friend in a foreign country or to come across the same unfamiliar word four times in one day Hand wrestles with seemingly less explicable questions as well what the Bible and Shakespeare have in common why financial crashes are par for the course and why lightning does strike the same place and the same person twice Along the way he
