European Defence Breaking New Ground:

European Defence Jean-François Morel, Alastair Cameron, 2009-10-01 Since 1999 Europeans have successfully launched and developed a European Security and Defence Policy What is the core of the European defence project and is there a roadmap according to which it is developing in order to tackle current security challenges What are the main drivers that lead the Europeans to act together and how effective are they in the field of international security A French naval officer and a Franco-British defence analyst jointly set about identifying problems between the main players and the avenues to explore in terms of European Defence

The Path to European Defence Karl von Wogau, 2004 After the Internal Market and the Introduction of the Euro the European Union is making the decisive steps towards the next large project on the way to European unification which is European Defence The recent Iraqi crisis has shown that a common European foreign policy is more necessary than ever In spite of this shortfall there has been important progress The European crisis intervention force such as it was defined in Helsinki in 1999 has already been deployed successfully in two operations Still creating a European Defence is an ongoing process where Europe has to continue to improve its capabilities The direction that the European Union will have to take in the coming years is indicated by the European Convention which has proposed to create a European Minister of Foreign Affairs and a European Armaments Research and Military Capabilities Agency Within the European Parliament there is a large majority for the necessity of a European Defence This is demonstrated by the contributions of representatives of the four major political groups in this book It also corresponds with the preferences of public opinion The draft of a European Security Strategy presented by Javier Solana in June 2003 is a good step towards a European Foreign and Security Policy which will be able to guarantee the security of the European citizens and to defend the interests of the European Union in the world High ranking European personalities such as Javier Solana Guy Verhofstadt Erkki Liikanen and Philippe Busquin have made valuable contributions to this book The authors set out to identify where we stand on defence and what remains to be done to help Europe evolve in the changing global context of the 21st century

The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe's major medium and lesser powers since the end of the cold war the

alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

European Defence - Breaking New Ground, 2013 European defence in the wake of the Lisbon treaty (Egmont Paper 21) Bruno Angelet, 2008

The EU-NATO Relationship Martin Reichard, 2016-02-17 The EU NATO relationship continues to develop at a time of significant change for both organizations Post 9 11 NATO embarked on a fundamental transformation recasting itself as an organization with global strategic reach and interest focused less on Europe than ever before At the same time the EU is also becoming a more global political actor Consequently there is growing evidence that over time the EU will take the primary place in providing military security in Europe This volume combines political and legal methods to provide a comprehensive analysis of the current and likely future relationship between the EU and NATO The work will be of interest to all those interested in the development of these two major organizations and international security more generally whether from a political or legal perspective

Europe as a Stronger Global Actor Simon Duke, 2016-11-10 This book considers the principal challenges facing the European Union which has been buffeted by a series of profound crises both internal and external These range from the future of Ukraine the Union's reactions to China's One Belt One Road initiative how to help stabilize countries to its south and relations with the United States The core argument is that the EU lacks a meta narrative that could indicate priorities and linkages between the various continental regional national and thematic strategies As a result the EU often appears to be a confusing and even contradictory actor to many international partners In response to these challenges the EU needs to develop a deeper sense of strategic awareness and confidence so that it may give a more convincing response to fundamental questions about the Union's role purpose and identity in a changing world

Fear and Uncertainty in Europe Roberto Belloni, Vincent Della Sala, Paul Viotti, 2018-08-02 Russia's intervention in the Ukraine Donald Trump's presidency and instability in the Middle East are just a few of the factors that have brought an end to the immediate post Cold War belief that a new international order was emerging one where fear and uncertainty gave way to a thick normative and institutional architecture that diminished the importance of material power This has raised questions about the instruments we use to understand order in Europe and in international relations The chapters in this book aim to assess whether foreign policy actors in Europe understand the international system and behave as realists They ask what drives their behaviour how they construct material capabilities and to what extent they see material power as the means to ensure survival They contribute to a critical assessment of

realism as a way to understand both Europe's current predicament and the contemporary international system *Artificial Intelligence and International Conflict in Cyberspace* Fabio Cristiano, Dennis Broeders, François Delerue, Frédérick Douzet, Aude Géry, 2023-05-11 This edited volume explores how artificial intelligence AI is transforming international conflict in cyberspace Over the past three decades cyberspace developed into a crucial frontier and issue of international conflict However scholarly work on the relationship between AI and conflict in cyberspace has been produced along somewhat rigid disciplinary boundaries and an even more rigid sociotechnical divide wherein technical and social scholarship are seldomly brought into a conversation This is the first volume to address these themes through a comprehensive and cross disciplinary approach With the intent of exploring the question what is at stake with the use of automation in international conflict in cyberspace through AI the chapters in the volume focus on three broad themes namely 1 technical and operational 2 strategic and geopolitical and 3 normative and legal These also constitute the three parts in which the chapters of this volume are organised although these thematic sections should not be considered as an analytical or a disciplinary demarcation This book will be of much interest to students of cyber conflict AI security studies and International Relations The Open Access version of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

EU Security Strategy Great Britain: Parliament: House of Lords: European Union Committee, 2004 The European Security Strategy A secure Europe in a better world was endorsed by the European Council in December 2003 The Committee's report examines this strategy focusing on current global security challenges and threats strategic objectives and policy implications for the EU The Committee finds that the strategy gives a useful starting point from which the EU member states can work together to deliver security although the EU has yet to identify and commit the necessary resources to make it a reality rather than just an aspiration The report recommends that the next steps should be for the EU through its member states acting in the European Council to identify its priorities for addressing global security to co ordinate the ongoing work of the EU so that development aid trade environment foreign and security policies aim to achieve the same security results and to commit the appropriate long term funding

The Populist Radical Left in Europe Giorgos Katsambekis, Alexandros Kioupiolis, 2019-03-14 Building on a comprehensive theoretical framework that draws on discursive and ideational approaches to populism this volume offers a comparative mapping of the Populist Radical Left in contemporary Europe It explores the novel discursive political and organisational features of several political actors as well as the conditions of their emergence and success while being alert to the role of relevant social movements Chapters feature case studies of the Greek party Syriza the Spanish Podemos the German Die Linke Jean Luc Mélenchon and France Insoumise

the Dutch Socialist Party and the Slovenian Levica Jeremy Corbyn's leadership of Labour in the UK and Momentum the movement that supports him is also examined A separate chapter is devoted to recent grassroots social movements that can be seen as instances of progressive populism such as the squares movement in Spain and Greece This book fills a crucial gap in the literature on radical left politics and populism in Europe contributing to the rapidly burgeoning field of populism studies

The Western European Union Sally Rohan, 2014-07-17 This full term study of the Western European Union WEU brings to life the history of Europe's search for a co-operative security and defence order from its post World War II origins to the present day Establishing the WEU as a support organization designed to promote the two security ideas of collective defence and integration through the primary organizations of Alliance and Community this book offers a window onto the challenges faced in the development and management of NATO and the evolving EC/EU over time As the WEU's historical journey unfolds the frequently competing visions of the future organization of the European security space are exposed in the fluctuating nature of its own functional evolution and devolution A hybrid organization driven by its dual support role the constructively ambiguous and conveniently autonomous WEU was to provide a mechanism through which divergent interests could converge and inherent tensions be relieved preventing NATO and EC/EU stagnation This book offers fresh insight into the means by which the gradual transformation of the institutional framework of European security was enabled and stakes the WEU's claim as a fundamental and life-long contributor to the stability of the European security system

After Victory G. John Ikenberry, 2019-04-16 The end of the Cold War was a big bang reminiscent of earlier moments after major wars such as the end of the Napoleonic Wars in 1815 and the end of the World Wars in 1919 and 1945 Here John Ikenberry asks the question what do states that win wars do with their newfound power and how do they use it to build order In examining the postwar settlements in modern history he argues that powerful countries do seek to build stable and cooperative relations but the type of order that emerges hinges on their ability to make commitments and restrain power The author explains that only with the spread of democracy in the twentieth century and the innovative use of international institutions both linked to the emergence of the United States as a world power has order been created that goes beyond balance of power politics to exhibit constitutional characteristics The open character of the American polity and a web of multilateral institutions allow the United States to exercise strategic restraint and establish stable relations among the industrial democracies despite rapid shifts and extreme disparities in power Blending comparative politics with international relations and history with theory *After Victory* will be of interest to anyone concerned with the organization of world order the role of institutions in world politics and the lessons of past postwar settlements for today

Back Cover *Europe's new security vocation*, **Building a European Identity** Aurélie Élisabeth Gfeller, 2012-07-01 The Arab Israeli war of 1973 the first oil price shock and France's transition from Gaullist to centrist rule in 1974 coincided with the United States attempt to redefine transatlantic relations As the author argues this was an important moment in which the French political elite responded with an unprecedented effort

to construct an internationally influential and internally cohesive European entity Based on extensive multi archival research this study combines analysis of French policy making with an inquiry into the evolution of political language highlighting the significance of the new concept of a political European identity

The Emerging Constitutional Law of the European Union Adam Bodnar, Michal Kowalski, Karen Raible, Frank Schorkopf, 2003-07-22 Young lawyers from different academic centres in Germany and Poland comment on the ongoing constitutional debate in the EU Each of the more than 20 articles is dedicated to a specific theme i e human rights institutional design current and future function of the EU homogeneity and identity security and defence policy home policy and common values Similarities as well as differences in the perspectives of an old EU Member State on the one hand and an EU Member State to be on the other hand are revealed
