Detecting Peripheral-based Attacks on the Host

Memory Patrick Stewin, 2014-12-27 This work addresses stealthy peripheral based attacks on host computers and presents a new approach to detecting them Peripherals can be regarded as separate systems that have a dedicated processor and dedicated runtime memory to handle their tasks The book addresses the problem that peripherals generally communicate with the host via the host s main memory storing cryptographic keys passwords opened files and other sensitive data in the process an aspect attackers are quick to exploit Here stealthy malicious software based on isolated micro controllers is implemented to conduct an attack analysis the results of which provide the basis for developing a novel runtime detector The detector reveals stealthy peripheral based attacks on the host s main memory by exploiting certain hardware properties while a permanent and resource efficient measurement strategy ensures that the detector is also capable of detecting transient attacks which can otherwise succeed when the applied strategy only measures intermittently Attackers exploit this strategy by attacking the system in between two measurements and erasing all traces of the attack before the system is measured again

Facing the Multicore-Challenge III Rainer Keller, David Kramer, Jan-Philipp Weiß, 2013-01-11 This state of the art survey features topics related to the impact of multicore manycore and coprocessor technologies in science and large scale applications in an interdisciplinary environment The papers included in this survey cover research in mathematical modeling design of parallel algorithms aspects of microprocessor architecture parallel programming languages hardware aware computing heterogeneous platforms manycore technologies performance tuning and requirements for large scale applications The contributions presented in this volume are an outcome of an inspiring conference conceived and organized by the editors at the University of Applied Sciences HfT in Stuttgart Germany in September 2012 The 10 revised full papers selected from 21 submissions are presented together with the twelve poster abstracts and focus on combination of new aspects of microprocessor technologies parallel applications numerical simulation and software development thus

they clearly show the potential of emerging technologies in the area of multicore and manycore processors that are paving the way towards personal supercomputing and very likely towards exascale computing

Digital Forensic Investigation of Internet of Things (IoT) Devices Reza Montasari, Hamid Jahankhani, Richard Hill, Simon Parkinson, 2020-12-09 This book provides a valuable reference for digital forensics practitioners and cyber security experts operating in various fields of law enforcement incident response and commerce It is also aimed at researchers seeking to obtain a more profound knowledge of Digital Forensics and Cybercrime Furthermore the book is an exceptional advanced text for PhD and Master degree programmes in Digital Forensics and Cyber Security Each chapter of this book is written by an internationally renowned expert who has extensive experience in law enforcement industry and academia The increasing popularity in the use of IoT devices for criminal activities means that there is a maturing discipline and industry around IoT forensics As technology becomes cheaper and easier to deploy in an increased number of discrete everyday objects scope for the automated creation of personalised digital footprints becomes greater Devices which are presently included within the Internet of Things IoT umbrella have a massive potential to enable and shape the way that humans interact and achieve objectives These also forge a trail of data that can be used to triangulate and identify individuals and their actions As such interest and developments in autonomous vehicles unmanned drones and smart home appliances are creating unprecedented opportunities for the research communities to investigate the production and evaluation of evidence through the discipline of digital forensics
