Computer-aided Maintenance Jay Lee, Ben Wang, 2012-12-06 In today's business environment, reliability and maintenance drastically affect the three key elements of competitiveness: quality, cost, and product lead time. Well-maintained machines hold tolerances better, help reduce scrap and rework, and raise consistency and quality of the part. In addition to cutting total production costs, today many factories are still performing maintenance on equipment in a reactive manner due to a lack of understanding about machine performance behaviour. To improve production efficiency, computer-aided maintenance and diagnostic methodology must be applied effectively in manufacturing. This book focuses on the fundamental principles of predictive maintenance and diagnostic engineering. In addition to covering the relevant theory, techniques, and methodologies in maintenance engineering, the book also provides numerous case studies and examples illustrating the successful application of the principles and techniques outlined

Sensory Templates and Manager Cognition Claus Springborg, 2018-03-29 This book explores the role of art and spiritual practices in management education. It takes recent developments in cognitive science relating to the metaphorical and embodied nature of cognition as its starting point. Introducing the concept of sensory templates, Springborg demonstrates how managers unconsciously understand organizational situations and actions

as analogous to concrete sensorimotor experiences such as pushing pulling balancing lifting moving with friction connecting and moving various substances Real life management and leadership case studies illustrate how changing the sensory templates one uses to understand a particular situation can increase managerial efficiency and bring simple solutions to problems that have troubled managers for years Sensory Templates and Manager Cognition will be of interest to scholars and students of managerial cognition leadership and neuroscience as well as practising managers and management educators
