as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends *Becoming Literate in Mathematics and Science*, 2001 *X-kit Fet G10 Mathematics*, Elasticity and Toughness Feng Wei, 2021-12-30 This book examines minban teacher policies and their implementation in China between 1949 and 2000 when rural areas were in severe shortage of qualified teachers During this period of time minban teachers made great contributions to education doing the same work as state employed school teachers while receiving much lower salaries due to non official status With solid fieldwork on oral history of minban teachers and policy actors and deep examination of a wealth of policy documents in private and governmental archives the author records the life history of minban teachers the process of minban teacher policies and the interaction between policies and individual strategies in M county pseudonym located in northern Jiangsu province of China The book reveals many interesting and sometimes surprising findings about the characteristics of educational policy implementation in China While China s minban teacher policies have come to an end rural education continues to be a major concern of policymakers and researchers alike The book is an important piece of scholarship for the readers interested in rural education in China and in how state society and culture interact to influence teacher policies and management in the Chinese context *Corporate Social Investment* Setlogane Manchidi, 2018-10-15 This book is easily one of the best works yet on how to make corporate social investment work for the benefit of ordinary people should be required reading by every CSI practitioner in Africa and abroad much time money and energy could be saved PROFESSOR JONATHAN JANSEN Developing an impactful corporate social investment CSI strategy and approach with real potential to positively change people s lives can be a tricky exercise Those grappling with how best to approach CSI will find thought provoking insights in this book that will contribute positively to how they view shape and execute their CSI strategy In a most accessible way this guidebook on CSI presents an

instructive and constructive way of building a CSI strategy Setlogane Manchidi Head of CSI at Investec is known in the CSI space for his passion and strong desire to see meaningful change in people's lives In this book informed by his experiences as a CSI practitioner over the years he unpacks what he considers to be essential aspects of CSI practice Manchidi adopts and articulates a question based approach to creating an effective CSI strategy Recognising that business is not separate from society Manchidi suggests that companies need to ask themselves some serious questions amongst them Why should they be doing CSI and importantly why are they doing it The questions which are reflected on the cover of the book are difficult ones which require complete honesty deep consideration and the necessity of placing impact at the centre of the formulation of CSI strategy Through this book Corporate Social Investment Setlogane Manchidi reminds us of the significance of a carefully considered CSI strategy and approach especially on a continent such as Africa with many socio economic challenges that continue to impact negatively on ordinary people's day to day lives El-Hi Textbooks in Print, 1984 Mathematical Modelling Education and Sense-making Gloria Ann Stillman, Gabriele Kaiser, Christine Erna Lampen, 2020-05-14 This volume documents on going research and theorising in the sub field of mathematics education devoted to the teaching and learning of mathematical modelling and applications Mathematical modelling provides a way of conceiving and resolving problems in people's everyday lives as well as sophisticated new problems for society at large Mathematical modelling and real world applications are considered as having potential for cultivating sense making in classroom settings This book focuses on the educational perspective researching the complexities encountered in effective teaching and learning of real world modelling and applications for sense making is only beginning All authors of this volume are members of the International Community of Teachers of Mathematical Modelling ICTMA the peak research body into researching the teaching and learning of mathematical modelling at all levels of education from the early years to tertiary education as well as in the workplace

Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and

reports empirical data from large scale studies      *Research in Education* ,1971      **Making Pupil Data Powerful** Maggie Pringle,Tony Cobb,1999-03-01 Ways of using pupil performance data to enhance teaching and learning      Improving Maths Pedagogy and Practice (IMPP) Scale Denise Kingston,Iram Siraj,Judy Barrett,2025-10-28 The Improving Maths Pedagogy and Practice IMPP scale is an innovative way of assessing and improving the quality and effectiveness of mathematics teaching in the first few years of primary or elementary schooling It is informed by the evidence base of practice shown to improve children s outcomes and extensive professional development delivered by the authors The IMPP supports both the how and what of teaching mathematics to young children encourages positive dispositions towards maths and addresses issues such as maths anxiety and disengagement It focuses on teaching developmentally appropriate maths with understanding using maths talk child friendly contexts concrete pictorial and abstract representations to their best effect This unique measurement scale supports the teaching of early mathematics in primary elementary schools using the evidence base of what works best to support fluency and mastery teachers content and pedagogical content knowledge of mathematics including comprehensive sets of practical examples quality improvement processes and self assessment of the mathematics taught in classrooms children learning mathematics with understanding which also supports their engagement enjoyment and achievements researchers auditors and or inspectors looking for a measure of mathematical quality and effectiveness in the classroom The IMPP will help teachers and school leadership successfully develop their children s mathematical understanding reasoning and problem solving Educators can use the scale for self evaluation of their own practice so they can build on what they already do well and improve where required Leadership teams and mentors can use it to audit quality support positive discussions and set effective development targets The scale is particularly useful when supporting children living with disadvantage and those with additional learning needs and maths anxiety
