

Evidence for Evolution

Part A - Homologous Structures: Evolution is defined as the change in the inherited characteristics of biological populations over successive generations. For each question below, identify whether the evidence is **anatomical** (body) – **homologous structures**, **anatomical** (body) – **analogous structures**, **molecular** (DNA) – **homologous structures**, **molecular** (DNA) – **analogous structures**, or from the **fossil record**. Then, using complete sentences, explain how it serves as evidence for evolution.

Example: Humans and dolphins have the same bones making up their arms and fins.

- a. Identify the evidence for evolution.

Anatomical – Homologous Structures

- b. Explain how this serves as evidence for evolution.

The arm and fin have similar construction, yet perform different functions. This means these are anatomically similar structures inherited from a common ancestor.

1. Scientists discover preserved bones of a large animal that no longer exists today.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

2. The human gene for muscle protein differs from the muscle protein in monkeys in 4 places. It differs from the muscle protein in chickens in 25 places.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

3. Humans, rabbits and whales all have an appendix, an extra piece in their digestive system. In humans, this structure is much smaller and is thought to no longer serve a purpose.

- a. Identify the evidence for evolution.

- b. Explain how this serves as evidence for evolution.

Evolutionary Linguistics April McMahon, Robert McMahon, 2012-10-11 How did the biological brain and behavioural structures underlying human language evolve When why and where did our ancestors become linguistic animals and what has happened since This book provides a clear comprehensive but lively introduction to these interdisciplinary debates Written in an approachable style it cuts through the complex sometimes contradictory and often obscure technical languages used in the different scientific disciplines involved in the study of linguistic evolution Assuming no background knowledge in these disciplines the book outlines the physical and neurological structures underlying language systems and the limits of our knowledge concerning their evolution Discussion questions and further reading lists encourage students to

explore the primary literature further and the final chapter demonstrates that while many questions still remain unanswered there is a growing consensus as to how modern human languages have arisen as systems by the interplay of evolved structures and cultural transmission

Evaluation in Sport and Leisure Andrew Adams, Kevin Harris, 2022-08-12 This book presents a critical assessment of evaluation theory and practice in sport and leisure It considers established and emerging forms of evaluation examines typologies issues contexts and processes and asks how evaluation practice can be improved in the future The book seeks to uncover some of the tensions and dilemmas that are present in choosing and applying evaluation strategies It considers the relationship between evaluation context and evaluator to discern how and why a particular strategy is employed It also highlights how power relationships affect and effect the evaluation process itself as well as those involved in conducting evaluations The book encourages the reader to challenge accepted methodologies in evaluation whilst acknowledging the central importance of evaluation and evidence for our understanding of the social impact and value of sport and leisure This book is important reading for any student researcher practitioner or policy maker with an interest in sport leisure and society sport and leisure management policy or development leisure studies or the wider relationship between sport leisure wellbeing and society
