Leading Schools in Challenging Times Bruce Anthony Jones,Anthony Rolle,2016-03-01 Over the past 30 years our public school system has received an unprecedented amount of attention as this concerns methods of school reform and policy strategies for bringing about this reform During the 1980s the emphasis of school reform was on transparency through school community partnerships Business and philanthropy for example became involved

with issues of schooling that was unheard of prior to this period The 1980s also gave rise to issues of school finance and student performance that went beyond traditional views that tended to focus on finance adequacy to views that focused more on school finance arrangements that would lead to actual equitable outcomes in student performance The 1990s witnessed the emergence of the comprehensive school reform movement whereby curriculum outsourcing occurred at rates that had never occurred before With this movement the role of teachers and school leaders in the creation of school curriculum diminished as school districts increasingly purchased vendor related curriculum packages which included teacher and leader training modules and methods of curriculum assessment On the heels of the increasing tendency of school districts to outsource school curriculum to curriculum vendors came a rise in demands for school accountability and school outcomes This was particularly evident with the passage of No Child Left Behind Act NCLB 2001 NCLB was also developed within a political context that called for demands in the academic improvement of schools and school districts that housed historically disenfranchised students These demands were particularly important as the nation experienced and continues to experience dramatic increases in student racial and ethnic diversity This volume entitled *Leading Schools in Challenging Times Eye to the Future* discusses varying types of school leadership in the context of key topics that have been at the center of on going school reform in the United States These topics include challenges opportunities and issues associated with our administrator and teacher leadership pipeline preparation and development leadership and school finance reform leadership and changing student and population demographics leadership and the role of community issues of leadership policy public accountability and school performance outcomes The authors also explicate these issues with a view to the future and the status of leadership in our public school system

Meeting the Challenges to Measurement in an Era of Accountability
Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest
